Create a Data Platform!

Launch a Data Platform in Azure Quickly and Efficiently

The Problem

Creating a data platform in Azure can be tricky. It can be both time consuming and costly if you do not have the proper experience and knowledge to launch it correctly.

The Solution

Spyglass' Data Platform DPi30 is designed to help you create a data platform in Azure quickly and efficiently. With Prebuilt Azure Blueprint for a secure Modern Data "Lakehouse" Deployment, deploying a customizable new platform is quick and easy. With dozens of prebuilt templates provided with the Blueprint, code bases, tool kit and other assets to leverage; your platform will be up and running before you know it!

Spyglass' Dpi30 program will allow your business to:

- Integrate multiple data sources to create an intelligent Data Lake that supports your business strategies
- Quickly build and deploy intelligent apps, backed by Azure's prebuilt AI capabilities
- Leverage the technology stack and data engine of your choice

The Benefits

- *Time to Market*– faster and more accurate insights and predictions 2-10x faster
- *Security*– Most secure, compliant, and scalable platform with best-in-class compliance out of the box
- *Flexibility*– Works with your current data sources to get the most from existing investments and grows with your business
- *Repeatability*– Spyglass's proven methodology and toolkit provides repeatable process and accelerators to speed the development of your solution
