Spyglass Microsoft Entra ID Governance Implementation

Securing internal and external Identities with Entra ID

The Challenge

Numerous clients encounter the difficulty of effectively managing identities in the cloud that go across multiple SaaS application and internal and external identity providers while trying to maintain a secure environment.

The Solution

The Spyglass Microsoft 365 Entra ID Governance implementation offer focuses on providing a way for customers to quickly take advantage of the full suite of Entra ID products across their environments.

Each migration phase corresponds to working to increase the level of automation, business value, and security for the environment. Each phase is outlined in more detail below:

Four Implementation Stages

- Assessment and Review
- Planning and Design
- Pilot and Deployment
- Automation

Deliverables

- Roadmaps
- Recommendations
- Documented Configurations

- Envisioning: Spyglass works to assess and evaluate the existing configurations and solutions in the organization while helping to identity the specific business use cases and security and compliance requirements surround Identity Governance.
- Design: Plan for critical elements including Change Management, Training, Adoption, and Communication. This phase also works to document out the specific requirements for Security and Compliance as well as those for meeting business use cases.
- Implementation: This phase is where the design and decisions made I earlier phases are tested and implemented within the organization. This includes tenant hardening and the deployment of specific solutions such PIM, Entitlement Management, Conditional Access, Identity Protection, MFA, B2B, B2C, External Identities, Access Reviews, Private and Public Internet, etc.
- Automate: Spyglass focuses this phase on being able to automate the management of tasks as much as possible and customize the employee experience through user lifecycle and onboarding/offboarding automation.

Additionally, Spyglass 365 can provide Endpoint Device Management Tasks. These are ongoing services that provides weekly and monthly proactive device management tasks, such as reviewing reports, adding/updating applications, reviewing and fine-tuning policies, and creating new policies as necessary.

Spyglass MTG Can Help!
