The Problem

Many frontline workers are required to complete inspections of various kinds. However, the process is not always easy or seamless.

As an example, when a restaurant employee arrives on-shift, they need to ensure that the food prep areas are sanitary and properly stocked and that all equipment is operating at safe temperatures, both hot and cold.

These inspections need to be done quickly and efficiently.

The Solution

Spyglass's **Facility Inspection Application Jumpstart is a 5-week/$25,000 implementation** that allows the use of Power Apps to capture data of the inspection via tablet.

Our Implementation:

- Equips the employee with a Power Platform solution that is accessible via Microsoft Teams on a tablet device
- Allows employees to capture inspection data, such as photos of the kitchen, via their tablet device
- Creates a dashboard to show the report and allows for updates and visibility
