

Building a Governed Data and AI Platform: Accelerate and Transform in Higher Education – Free 2 Hour Workshop

- **Problem**

- Understanding and implementing a governed Data and AI platform in the higher education space can be difficult and time-consuming.

- **Solution**

- Spyglass MTG Microsoft provides an overview of the challenges in higher ed data management and the transformative potential of AI.
- Learn how Spyglass Constellation integrates data orchestration and governance into a seamless platform.
- How to use it: Techniques around rapid development and deployment of machine learning models and RAG applications.
- Explore tools for transformation and how they can be used to streamline operational processes and achieving faster deployment.

- **Benefits**

- Leave this workshop with a clear understanding of what constitutes a governed Data and AI platform, gain insights into leveraging AI to enhance data-driven decision-making and operational efficiency, and practical knowledge of tools and frameworks for rapid AI deployment.
