

Hybrid Cloud Management with Azure Arc

Simplify hybrid and multi-cloud management with Azure Arc

The Challenge

Managing applications and systems across multiple cloud environments can be complex and time-consuming. Organizations often struggle with the lack of centralized visibility, inconsistent security policies, and the need to navigate different on-premises and cloud provider interfaces. This leads to potential security gaps and increases operational overhead.

The Solution

The Spyglass MTG Hybrid Cloud Management with Azure Arc 4-week offering provides a unified and streamlined approach to setting up and managing applications and systems across a hybrid and multi-cloud environment. It enables organizations to centrally monitor, configure, and protect their workloads, ensuring consistent management capabilities and reducing the complexity of managing operations and security across multiple on-premises environments and cloud providers.

- **Hybrid and Multi-cloud Support:** Seamlessly integrate with On-Premises, Azure, AWS, Google Cloud, and other major cloud providers to manage workloads across diverse environments
- **Centralized Management:** Gain a single pane of glass view to configure, monitor, and manage policies across all supported systems
- **Automated Deployment and Configuration:** Simplify the setup process with automated deployment and configuration of Azure Arc and additional capabilities, ensuring consistent security across all cloud workloads
- **Centralized Monitoring:** Simplify monitoring capabilities and streamline configuration while providing reporting and alerting at scale across your hybrid cloud environment

Core Components

- Onboarding Azure, AWS, GCP, on-premises environments with Azure Arc
- Setting up initial solutions for Monitor, Update Manager, Defender for Cloud and Policy
- Knowledge transfer and initial process integration

Agenda

- Week 1: Analysis & Inventory
- Weeks 2: Design & Deployment
- Weeks 2-4: Onboarding & Integration
- Week 4: Knowledge transfer

About Spyglass MTG- A Women Owned/Women Led Company

For over 15 years, we've closely partnered with Microsoft to bring their vast and expanding suite of enterprise solutions to our clients. We leverage proven methodologies, migration tools and expert consultants to architect, build, deploy, migrate to, and manage Microsoft solutions. Whether you are deploying or upgrading M365, implementing Azure, deploying Teams, building a SharePoint Site, developing a Security or Governance Model, designing a Modern Warehouse or BI Solution, or developing AI apps on the Power Platform, we can help!
