

AI in 45 with GENIE - (IAi45 @\$125k Fixed Fee)

- **Problem**

- Organizations often face a challenge of creating AI solutions quickly and efficiently within the Microsoft Cloud environment. This includes the complexity of AI integration, the need for rapid deployment, and the requirement for user-friendly interfaces. Additionally, organizations struggle to extract valuable insights from enterprise data and ensure scalability and adaptability of AI solutions.

- **Solution**

- To combat this issue, Spyglass' AI Solution in 45 Days (IAi45) with GENIE offers a fast-track service for creating AI solutions. This solution accelerates AI platform deployment and AI-driven applications with user-friendly interfaces, drag-and-drop functionality, and a rich library of connectors and templates. The methodology establishes a robust Microsoft Cloud AI Solution framework, making AI agent integration quick and seamless.

- **Benefits**

- This solution simplifies AI integration, accelerates deployment, enhances data insights, and provides user-friendly and scalable solutions. Other benefits include:
 - **Enhanced Data Insights:** Leverage AI to extract deeper insights from enterprise data, use advanced GENIE for smarter decision-making, content generation, business automation, and knowledge consumption.
 - **Rapid Development of Data & AI Applications:** Seamlessly integrate diverse data sources, accelerate deployment using pre-built frameworks and tools, and bring solutions to production faster.
