SPYGLASS MTG

The Problem

Retail store employees are often asked questions about products from the customers.

While it is near impossible to memorize every detail for every product, it is possible to give your employees a platform to quickly find that information.

SPYGLASS MTG

The Solution

Spyglass's **Product Knowledge Application Jumpstart is a 5-week/$25,000 implementation** that enables your frontline workers with an app that provide quick access to product documentation and other self-enabling data needed to provide accurate information to their customers.

Our Implementation:

- Equips the employee with a Power Platform solution that is accessible via Microsoft Teams on a mobile device for quick access to information they need

- Helps employees better understand products, in turn helping their customers do the same
