

Microsoft Power Apps and Viva Modules

- **Problem**

- Client required Viva module driven solutions to showcase to the FLW driven organizations on how these solutions can be leveraged as part of their day-to-day operation and business optimization
- Client required dynamic demo applications scenarios with less than 15 clicks to showcase the features and functionalities as viable solution in order to drive sales engagements in both the Retail and Financial Service sector

- **Solution**

- Worked with the client's Retail and Financial Services team to curate real life FLWs daily operational scenarios for the demo applications to be built
- Leveraged PowerApps to create 6 dynamic demo applications that addresses the FLW scenarios and how data can be extended to and pulled from Viva Connection, Viva Learning, and Viva Topic to further optimize their user experience.

- **Benefits**

- FLW driven organizations can take advantage of the Viva Modules to address business needs and improve employee engagement
