

Improve Data Insight with Viva & Syntex 4-Week Implementation

Maximizing the power and intelligence of the data hosted within SharePoint

The Problem

For data driven teams that leverage SharePoint intranets to gain insight, it can be difficult to quickly find certain information. Searching through different pages and documents across the company's provided platform proves to be time consuming and frustrating.

The Solution

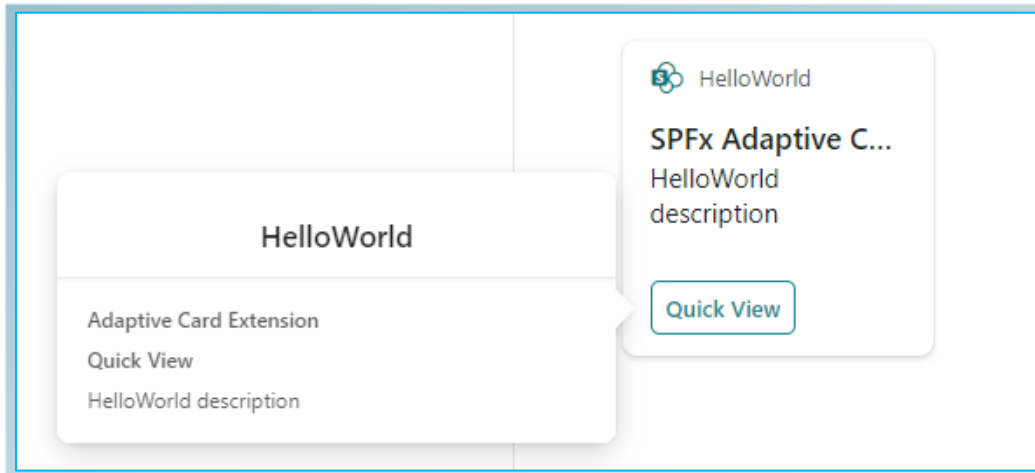

The Spyglass offering to Improve Digital Experiences with Viva and Syntex provides a data driven team with quick access to information stored on the intranet. Powered by AI, Viva Connection and SharePoint Syntex work together to greatly improve data insight experience. The offering aims to transform typical intranet content into knowledge by providing quick insights from disjointed documents within multiple SharePoint repositories into a single pane of glass. This offering is a full-service model from requirements, scoping, design, development, and support. Our approach leverages an agile methodology to quickly develop and deploy all of your integration needs.

Agenda

- Week 1
 - Discovery, Requirements & Development begins
- Week 2
 - Development continues
- Week 3
 - Development continues & Testing begins
- Week 4
 - Testing & Deployment

Deliverables

- Custom Intranet SPFx elements leveraging Viva Connection and SharePoint Syntex

Spyglass MTG Can Help!
