Democratize the use of Generative AI

Accelerate your business with Microsoft AI services

2025

Generative AI: Perform in Your Business Processes!

"Two years ago, AI was unveiled to the public eye. Since then, it has become a daily presence in our personal lives and, more recently, in our professional endeavors. It is only natural that companies worldwide are turning to Generative AI to optimize their daily performances."

CHALLENGES 2025

- Competition and Differentiation
- Model Training
- Interpretability
- Infrastructures
- Ethics and Responsibility
- Security"

IDEAL SOLUTION

- Identify relevant use cases
- Define clear objectives
- Collect and prepare data
- Select appropriate models
- Manage confidentiality and security
- Collaborate with experts
- Train and familiarize teams

KEYS FIGURES

The number of companies using AI has increased by **200%** between 2019 and 2022.
 The global market is valued at **267 billion** dollars by the end of 2022.
91% of large corporations plan to invest in this type of solution in the next five years.
+60% of companies with AI-related solutions have reported an increase in productivity."
