

PrismAI Document Agent

Microsoft 365 Copilot for everyday work

Prepared by SRKK AI Bhd

PrismAI Doc

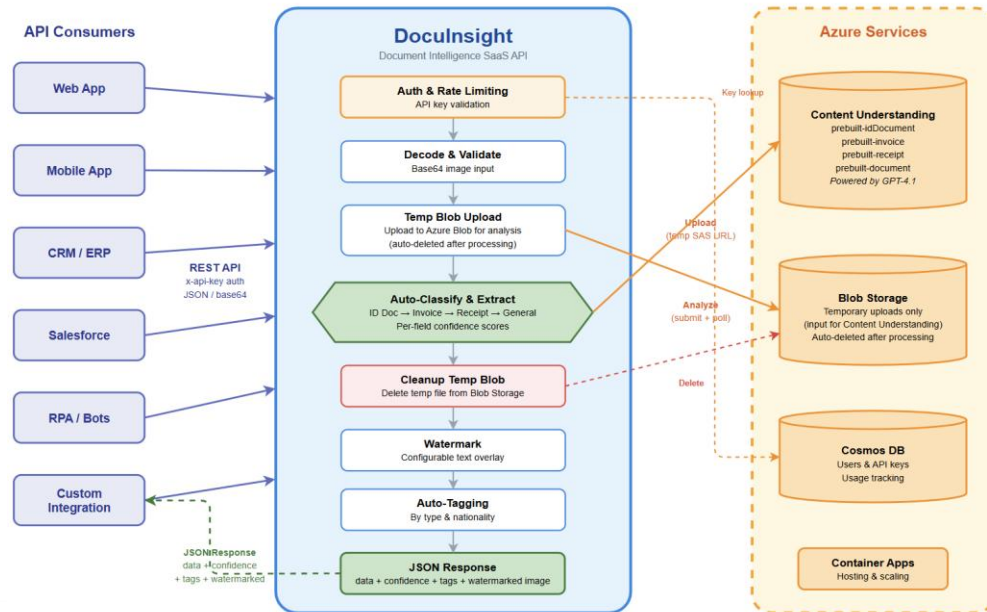

Discover how a seamless API transforms everyday documents into structured insights, integrating effortlessly with your existing systems to drive faster, informed, and actionable business decisions.

THE RESULT

- **SaaS API:** Use continuously improving pre-built models through using API call. Fully managed, auto-scaling service. Predictable pay-per-document pricing. Speed up convert backlogged documents into structured data in seconds, not hours.
- **Drive Digital Workflows:** Enable straight-through processing where data flows directly from documents into core business systems (ERP, CRM).

CURRENT CHALLENGES

- **Manual Data Entry:** Employees spend more time on manual document processing instead of high-value tasks
- **Delayed Decisions:** Document sit in queues for days, delaying payments and damaging supplier relationships
- **Inconsistent Data:** Multiple people entering data creates inconsistencies across systems
- **Scalability Issues:** Peak periods require temporary staff or overtime, increasing costs.

THE BENEFITS

- **Plug-and-Play Integration:** IT teams stay productive; no disruption to existing workflows.
- **Zero-Shot Learning:** Pre-trained models work immediately on your documents.
- **Confidence Scoring:** Each extracted field includes a confidence percentage (as shown in the code example).
- **Cost Predictability:** Consumption-based SaaS pricing with no infrastructure to manage.

TECHNOLOGY PLATFORM

- Azure AI Content Intelligence
- Power Automate/Logic Apps
- Python code and output to structured JSON file
