

KEY360
MANAGEMENT PLATFORM

Risk Management

Our Risk Management empowers project teams to proactively identify, assess, monitor, and mitigate risks across the entire project lifecycle.

Fully integrated within the KEY360 platform, this module centralizes all risk-related activities—offering a live, auditable risk register, customizable templates, and seamless workflows that align with cost, schedule, and issue management.

With real-time dashboards, automated alerts, and compliance-ready reporting, teams gain the visibility and control needed to manage uncertainty with confidence.
