

Multibank Connectivity Made Easy

Do you want to automate and streamline the exchange of your financial data with your banking partners?

If you are a connected, digital-first business that demands real-time data to operate your business model and provide competitive insights, you know how challenging it can be to manage your financial data across multiple banks and systems.

You may be relying on legacy technologies and manual processes that prevent you from getting real-time updates on your account balances and transactions, complicate your payables and receivables, and limit your cash visibility and forecasting.

You may be spending hours every day connecting to bank portals, downloading and uploading files, copying and pasting data into Excel, and dealing with connectivity and integration errors.

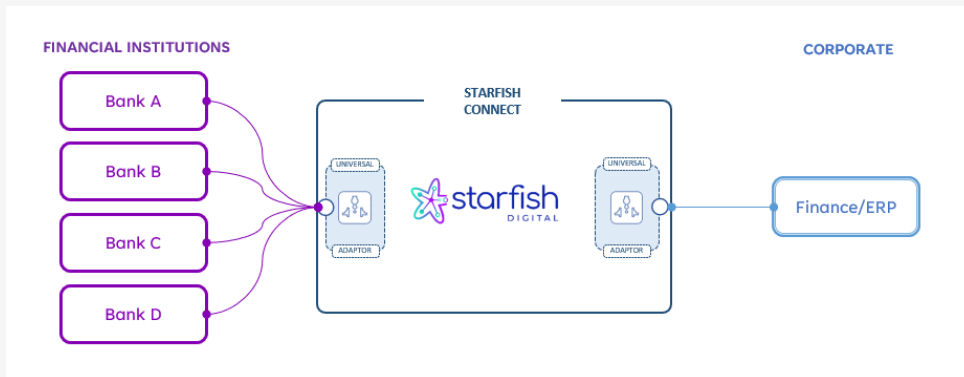

You may be missing out on opportunities to use your bank account information to drive insights and analysis that can help you grow your business.

If this sounds familiar, you need Starfish Digital.

Starfish Digital: The Ultimate Solution for Corporate Financial Data Connectivity

What is Starfish Digital and how can it help you?

Starfish Digital is a financial connectivity platform that connects and delivers financial data between corporates and financial institutions. The platform is a secure, high-performance, scalable connection between your finance/ERP/TMS and ALL your banks.

With Starfish Digital, you can:

- **automate** your financial data exchange with your banking partners, saving you time and resources
- **eliminate** connectivity and integration errors, ensuring data accuracy and reliability
- **access** real-time data on your account balances, transactions, payments, and more, enabling better cash management and forecasting
- **leverage** your financial data to generate insights and analytics that can help you optimize your business performance and growth

Starfish Digital is different from other solutions because our platform:

- does not see or store your sensitive information, ensuring data privacy and security
- is independent of bank and software application vendor specific protocols, formats and processes, giving you flexibility and interoperability
- focuses solely on data movement, delivering fast and efficient data transfer
- has over 50 global and regional banks in Asia connected, offering you a wide network of banking partners

How much does Starfish Digital cost?

Starfish Digital is a SaaS platform that flexes with the number and location of your banks. Starting at US\$20k per annum for five bank connections.
