

ELECTRONIC VALUE MANIFEST (MVE) · MEXICO

The MVE stops being a form. It becomes evidence.

Collection, classification and cross-validation of your foreign-trade documents — invoice, packing list, COVE and pedimento — before a single Value Manifest is filed.

AUDIT-READY FROM THE VERY FIRST PEDIMENTO

Your MVE software is just an expensive form.

Filling out the Value Manifest isn't the hard part. The hard part is making sure what you declare matches what your documents actually say.

01

Manual data entry

Data re-typed into a web form, field by field, shipment by shipment.

02

No cross-check

Nobody compares invoice, packing list, COVE and pedimento against each other before filing.

03

Invisible errors

Discrepancies don't show up today. They show up in the customs review, months later, with penalties.

04

+1 hour per MVE

Specialized staff spending hours on a task that should take minutes.

THE SOLUTION

From loose documents to a defensible file, in five steps.

STEP 01

Collection

Receives documents by email, shared folders or API — without changing how your brokers and suppliers work.

STEP 02

IDC classification

The IDC engine identifies and structures every document: invoice, packing, COVE, pedimento, transport and annexes.

STEP 03

Cross-validation

27 deterministic checks compare documents against each other: values, additions, units, suppliers, serial numbers.

STEP 04

ADRIAM opinion

ADRIAM writes a narrative opinion with severity, legal basis and recommendations for every finding.

STEP 05

File + MVE

The digital file is assembled and the MVE is filed only when the evidence is complete and consistent.

CROSS-VALIDATION

27 checks before filing.

Every MVE is verified against its supporting documents. Errors get fixed beforehand — not in front of the authority.

CROSS-VALIDATION		PED 26 47 3454 6002187
V03	Invoice value ↔ COVE	OK
V07	Incoterm ↔ additions	OK
V12	Packing units ↔ pedimento	OK
V15	Declared exchange rate	MED
V21	Supplier ↔ COVE issuer	OK
V24	Fixed-asset serial/model	OK
27 checks · 1 finding		AUDIT-READY ✓

KEY FEATURES

Everything a form will never do for you.

Pre-validation before filing

Errors get fixed beforehand, not in front of the authority.

Multi-document reconciliation

Invoice ↔ packing ↔ COVE ↔ pedimento, field by field.

Customs-review risk scoring

HIGH / MEDIUM / LOW severities with legal basis.

Audit-ready file

Evidence archived, traceable and audit-ready at any moment.

All import regimes

A1, IN, AF, V1, G1, RT — including fixed assets.

Scale without friction

Batch, multi-client and multi-plant with full traceability.

AUDIT-READY

Audit-ready from the day it's filed.

The complete evidence — documents, checks and opinion — is archived and traceable per operation.

Customs review (glosa)

The file speaks for itself before the customs authority's review.

Tax authority audit

Supporting documentation for the declared value, organized and verified.

Internal review

Corporate and compliance audits with full traceability.

Built around the regulation, not on top of it.

Art. 59 fr. III LA

The importer's obligation to hold the information and documents that support the declared value.

Art. 81 RLA

Elements and documentation that make up the value manifest.

Rule 1.5.1 RGCE

Guidelines for filing the value manifest as an electronic document.

Art. 36-A LA

Electronic transmission of the documents covering the goods: the basis of the digital file.

PROVEN TRACK RECORD

Some of the companies that trust the inSUPPLY platform.

Clients who stay for many years.

Available on Microsoft Marketplace.

Offer published under the Contact Me model:

01

Request information

Find inSUPPLY MVE PREMIUM on Marketplace and request contact.

02

We reach out

Our team learns your operation and sizes the solution.

03

Tailored proposal

A demo with your own documents and an implementation plan.

Stop fixing MVEs. Start preventing them.

Tell us how your foreign-trade operation works and we'll show you — with your own documents — what inSUPPLY MVE PREMIUM would catch today.
