DIY Data Recovery Software

Simple yet powerful data recovery software designed to retrieve lost files from accidental deletion, drive formatting, file corruption, missing partitions, bad sectors, and more. Effortlessly recover data from HDDs, SSDs, 4K drives, USB flash drives, SD cards, and other storage media. Stellar also supports recovery from crashed or non-bootable Windows® systems and offers advanced capabilities for QNAP®, ASUSTOR® & Synology® NAS, RAID arrays, and Virtual Drives

SOFTWARE WITH EXCELLENT CAPABILITIES

Recovers Lost or Deleted Data
Recovers data for all data loss scenarios. Be it an accidental deletion, drive formatting with no backup, drive corruption, disk errors, system errors, and more.

Recovers Lost Partitions
If your entire partition is missing due to accidental deletion, drive formatting, or drive corruption, you can easily recover the lost partitions of your hard drive with this tool.

Recovers from Crashed Systems
Creates a bootable USB media that allows data recovery from crashed or non-bootable Windows PCs. It is best suited for data loss due to system failure.

RAW Data Recovery
Recover lost files from severely corrupted storage devices with advanced signature-based technology. Effortlessly restore data from HDDs, SSDs & other media, even in the toughest data loss situations.

Repair Corrupt Photos & Videos
Add-on photo and video repair capability to repair corrupted, blurry, or unusable images and videos shot with all types of cameras - DSLR, action camera, drone, CCTV camera, & more.

Encrypted Drive Recovery
Effortlessly recover lost or deleted data from BitLocker-encrypted HDDs, SSDs & other storage devices. The software ensures secure data retrieval without compromising encryption.

Storage Devices Supported

Hard Disk	PC/Laptop	SSD
External Drive	USB	SD Card

Testimonial

"Lost crucial, priceless files - got them all back!"
