

AI Business Solutions

Supercharge your Business with AI-Powered Agents.

Build, deploy and scale AI Agent solutions with Microsoft Copilot Studio & Low-Code AI tools

Our Packages

Choose the engagement that fits your starting point.
Each package is time-boxed, outcome-driven, and ready to show value fast.

M365 Copilot

Copilot Pilot

30 USERS / 6 WEEKS

A guided test-drive of Microsoft Copilot inside your everyday M365 apps.

We handle tenant readiness, user enablement, and success metrics so you finish with clear data and a go-forward adoption plan.

No long-term commitment.

Productivity Bootcamp

50 USERS / 5 WEEKS

A five-week productivity sprint that rewires daily work around Copilot best practice.

We run live labs, workflow makeovers, and peer coaching so fifty champions leave skilled, confident, and ready to scale.

Momentum that sticks.

Copilot Studio

AI Agents Factory

SPRINT-BASED

A factory to design, build, and govern multiple agents in parallel.

We map use cases, integrate data, and run acceptance testing so releases land safe, secure, and production-ready.

Continuous value pipeline.

AI Agent Kick-start

IN LESS THAN 15 DAYS

A fifteen-day fast-track that puts your first agent into production.

We set governance, connect data, prototype, and validate with users so you gain tangible results plus a repeatable template.

Fast, tangible, repeatable.

Our Expertise

A multidisciplinary team blends governance, change management, and low-code engineering to make Copilot stick in everyday work.

Tenant Governance

Security, Compliance & Licence Optimisation

Adoption & Change

Champions, Comms, In-app Nudges

Workflow Redesign

Copilot-first Process Mapping & Automation

Power Platform Engineering

Low-code Apps & Connectors

Analytics & ROI

Usage Telemetry, Value Dashboards

Responsible AI

Privacy, Bias Checks, Human-in-the-loop
