trio

Trio: Simplified IT Management & Security

The Solution for All Your Devices – Seamless MDM & Compliance Automation for SMBs.

CONNECT | MANAGE | PROTECT

Product Summary

Trio is an advanced Mobile Device Management (MDM) solution designed to streamline IT management and enhance security for small and medium-sized businesses. With its centralized platform, Trio efficiently manages various mobile devices, from smartphones to tablets and laptops.

Key Features

Device Management
- Enroll and manage a variety of devices, ensuring they seamlessly integrate into your IT infrastructure.
- Perform remote wipe & lock and reset passwords to safeguard data in case of device loss or theft.
- Enforce device configurations and policies to maintain security and compliance standards.
- Track device location and activity for enhanced security and asset management.
- Integrate seamlessly with popular platforms to streamline device management processes.

Software Management
- Distribute and manage apps across your devices efficiently, ensuring consistent software availability.
- Set app permissions and restrictions to control access and enhance data security.
- Manage software licenses effectively to optimize usage and reduce costs.
- Coordinate app updates and deployments seamlessly across your device fleet.

Employee Management
- Provide self-service portals (kiosks) for customers in industries like healthcare and retail, enhancing user experience and optimizing employee efficiency.
- Implement role-based access control to ensure secure and appropriate access to resources.
- Maintain audit trials and generate comprehensive reports for compliance and accountability.
- Manage the entire employee lifecycle, from onboarding to offboarding, with ease.

Security Measures
- Automatically manage patches to protect devices from vulnerabilities and ensure software integrity.
- Ensure endpoint security compliance to prevent unauthorized access and data breaches.
- Detect and mitigate malware and vulnerabilities proactively to maintain a secure IT environment.

Benefits

Improved Security:
Trio improves your device and data security through enforced strong password policies, remote wipe capabilities, and data encryption. By ensuring that devices are protected with strong passwords and encryption, Trio reduces the risk of unauthorized access and data breaches. In case of a lost or stolen device, remote wipe capabilities allow IT administrators to erase sensitive data remotely, safeguarding confidential information from falling into the wrong hands.

Simplified Management:
With Trio, managing your mobile devices becomes effortless through a centralized platform consolidating device management tasks. This centralized approach streamlines IT workflows, reduces the administrative burden on IT teams, and enhances operational efficiency. IT administrators can easily deploy updates, enforce policies, and monitor device health from a single dashboard, ensuring consistent management across all devices.

Reduced Costs:
By optimizing device lifecycles and reducing IT support costs, Trio helps businesses achieve significant cost savings. Through efficient management practices, Trio prolongs device usability, reducing the frequency of costly hardware replacements. Moreover, streamlined management processes and reduced administrative overhead contribute to lower IT support expenses. Overall, Trio's cost-saving benefits extend across operational efficiencies and lifecycle management strategies, supporting long-term financial health for businesses of all sizes.

Target Audience

Trio provides essential device management solutions tailored for businesses across various industries. Whether you're a startup seeking agile device management or an established enterprise requiring scalability, Trio adapts effortlessly to your business size and sector.

For **businesses**, Trio helps to streamline device management, enhancing operational efficiency, and improve data security.

In **fintech**, Trio safeguards sensitive financial data across mobile devices, providing security and efficiency.

For **logistics** companies, Trio enables efficient tracking and management of handheld devices, improving productivity and logistics operations.

In **healthcare**, Trio ensures seamless management of medical devices and tablets, maintaining compliance with strict regulations.

OS Support

Trio ensures device compliance and security across the organization. Trio agents can be seamlessly installed on various operating systems and devices, including:

macOS   iOS   iPadOS   Android   Windows

Supporting a wide range of operating systems is crucial for ensuring comprehensive device management and security. This multi-platform support allows Trio to effectively monitor, manage, and enforce policies across diverse device fleets, enhancing organizational efficiency and minimizing security risks associated with heterogeneous IT environments.

Regulatory and Compliance Information

Trio takes data security seriously. We are committed to protecting your organization's sensitive information by adhering to the highest industry standards. Trio has achieved the following certifications:
