

## Solution Health Check

An offering to check the performance of your STEP system to maximize your MDM capabilities

## Scope

The Solution Health Check will be conducted by the Stibo Systems Professional services team holding several interviews or workshop sessions with preparation and wrap up, followed by a summary session, and will cover the following:

- **Business overview** – providing insight into the businesses core strategies and processes, the way information is gathered and distributed and its IT application landscape.
- **Pain points** – providing insight into the perceived business and STEP-related pain points.
- **STEP usage assessment** – providing insight into the STEP functionalities which are currently being utilized, as well as into additional components which can assist in adding business benefits and help meet business-strategic objectives.

## Contribution

To get the most out of the Solution Health Check, it needs to be a joint exercise with experienced people from both sides.

Stibo Systems will bring in expertise of highly skilled people and interview expert resources from your team in the following areas:

- MDM program leadership
- Business leads of the consuming areas
- MDM and business-area subject matter experts
- MDM application users

## Stibo Systems deliverables

The Solution Health Check will be closed with a report, including the information from the workshop and recommendations on how to improve the business usage of the MDM tools. The recommendations will cover the MDM solution and its configuration, MDM processes and organization, as well as how to use the information in the operational business processes.

**PURPOSE:** The Solution Health Check gathers information relating to your core business visions and ambitions and how the MDM strategy supports these. The assessment reviews the current business pain points and the usage of STEP considering the most recent available technology, functionality and best-practice MDM experience.

Assessing how your MDM tools can be fully utilized to support your business, achieving the organization's core business ambitions which may have changed considerably over time.

**BENEFITS:** The recommendations will provide you with possible initiatives to maximize your MDM capabilities and usage of the gathered information.

**TIME FRAME:** The expected effort time frame for the assessment is 5 days per data domain.

If you want to know more about this offering, please reach out to your Stibo Systems contact person.

## About Stibo Systems

Stibo Systems is the leading enabler of data transparency through master data management and data syndication. Built on an open platform with scalable, cloud-native SaaS technology, our solutions empower many of the largest and most innovative global companies with better data quality and visibility. This creates a trusted data foundation for enhancing operational efficiency, making informed decisions, delivering superior customer experiences and supporting sustainability initiatives. Headquartered in Aarhus, Denmark, Stibo Systems is a privately held subsidiary of Stibo Software Group, which guarantees the long-term perspective of the business through foundational ownership.
