Industrial IoT Made Easy

www.StickerControl.com

Asset Tracking Process Automation Operations Optimization

Powerful

Flexible

Straightforward

The benefits of advanced technologies
without large company resources

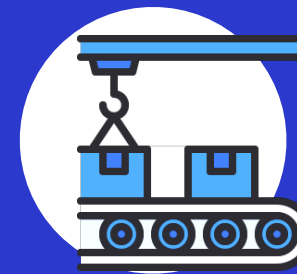

Common Operational Problems

“Lost” inventory

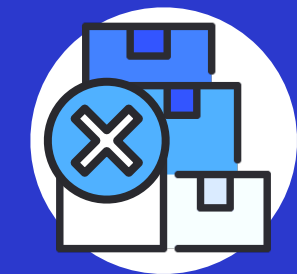

Errors on customer shipments

Sub-optimal equipment use and maintenance

Loss of reusable packaging / products

Understocks and Overstocks

Lack of visibility

Manual processes

Paper and spreadsheets

Lack of timely, accurate data and/or data silos

Workforce constraints

Suppliers / customers limiting communication and visibility

Common underlying causes

Our Software System Addresses those Causes

We offer industry 4.0 technologies
without an enterprise system
deployment effort

Sensors

RFID, barcodes, GPS ... – plus digital forms:

- Automate manual processes
- Eliminate paper and spreadsheets
- Capture data / integrate with other systems

Benefits

- Improve operational visibility
- Ensure tasks are performed on time, every time
- Optimize operations (including algos / ML tools)

Recap

▶ **We are a SaaS system**

- Hardware agnostic
- Key is how to capture data

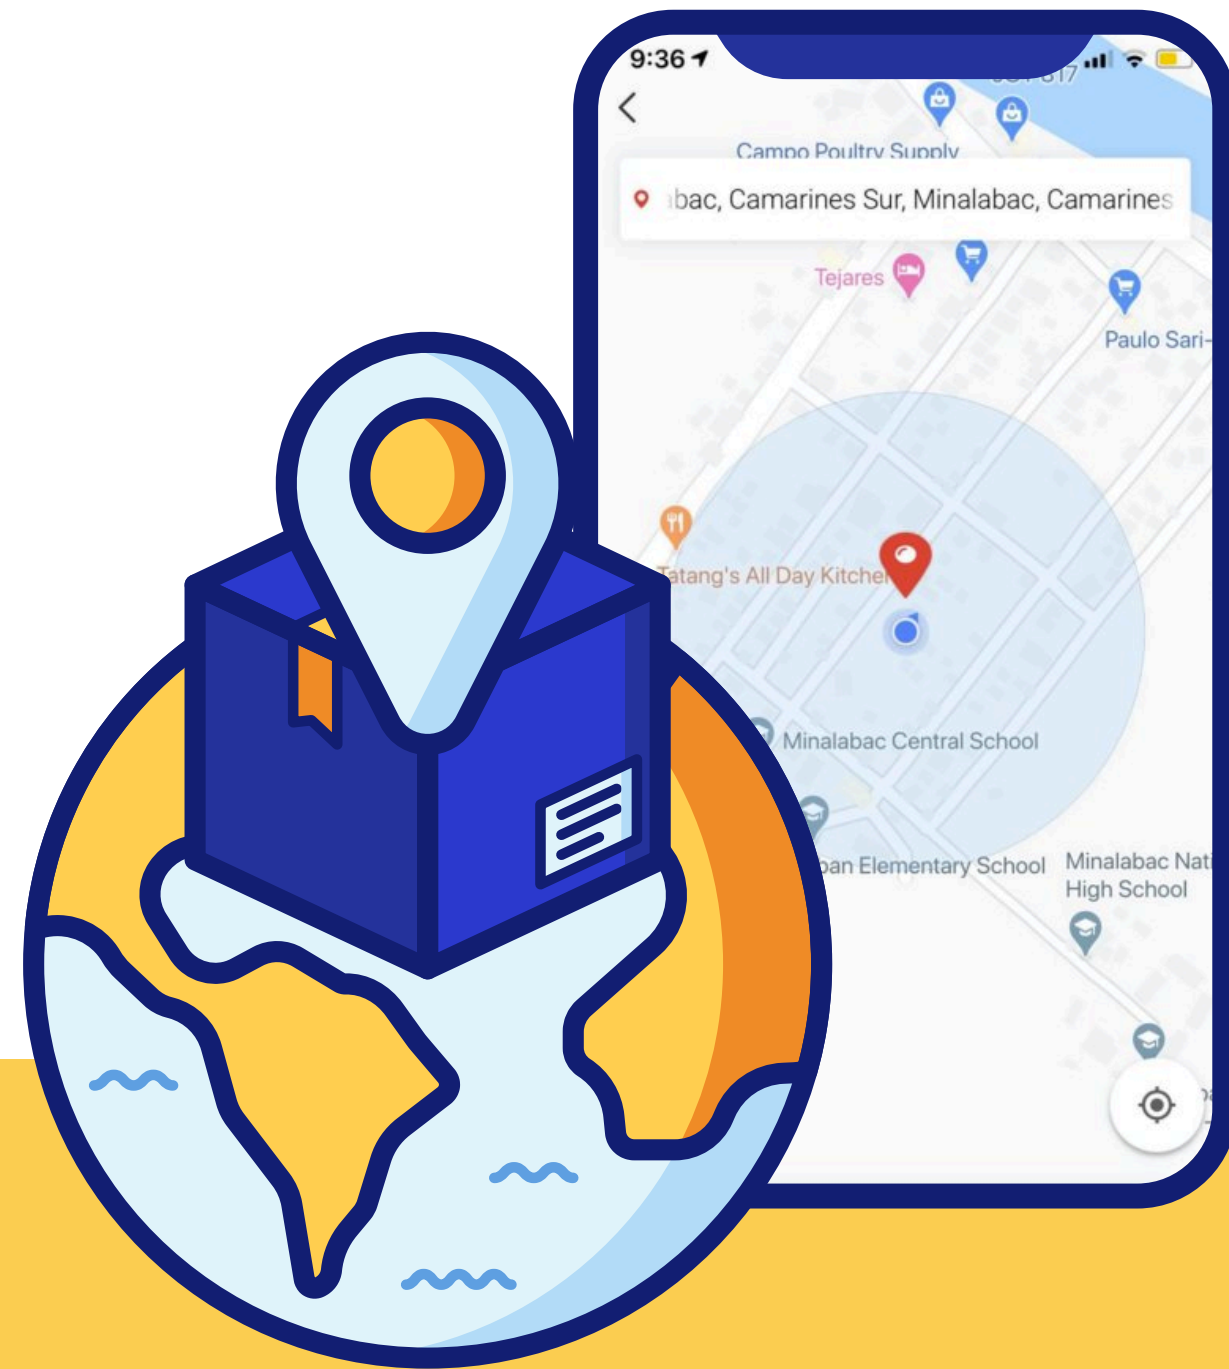

▶ **Lite customization**

▶ **Quick ROIs**

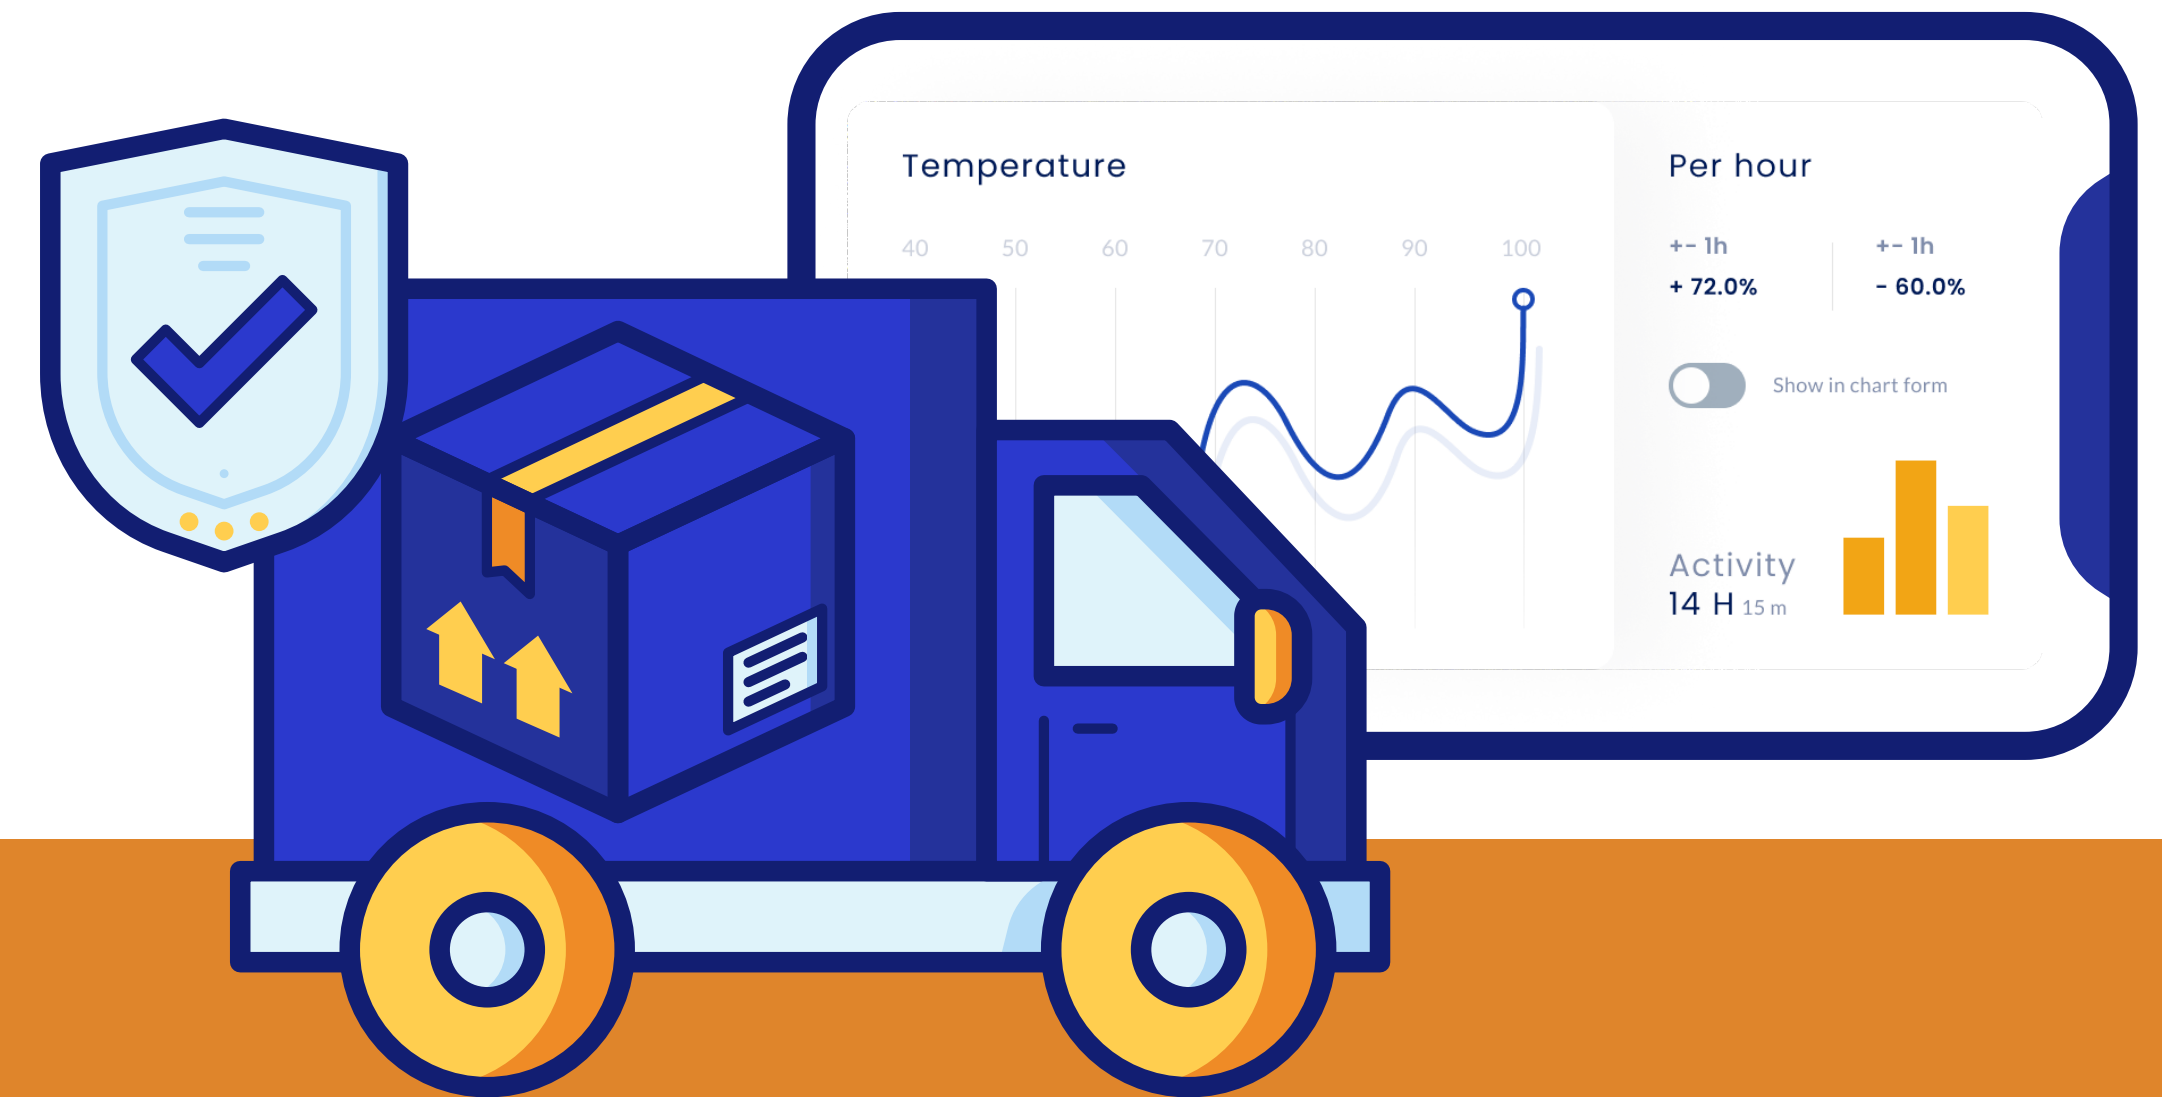

- Do not over-solve the problem
- Expand functionality as customer moves through digitization journey

Recent Use Cases

Monitor shipment location

Monitor shipment condition

Recent Use Cases

Validate accuracy
of shipments

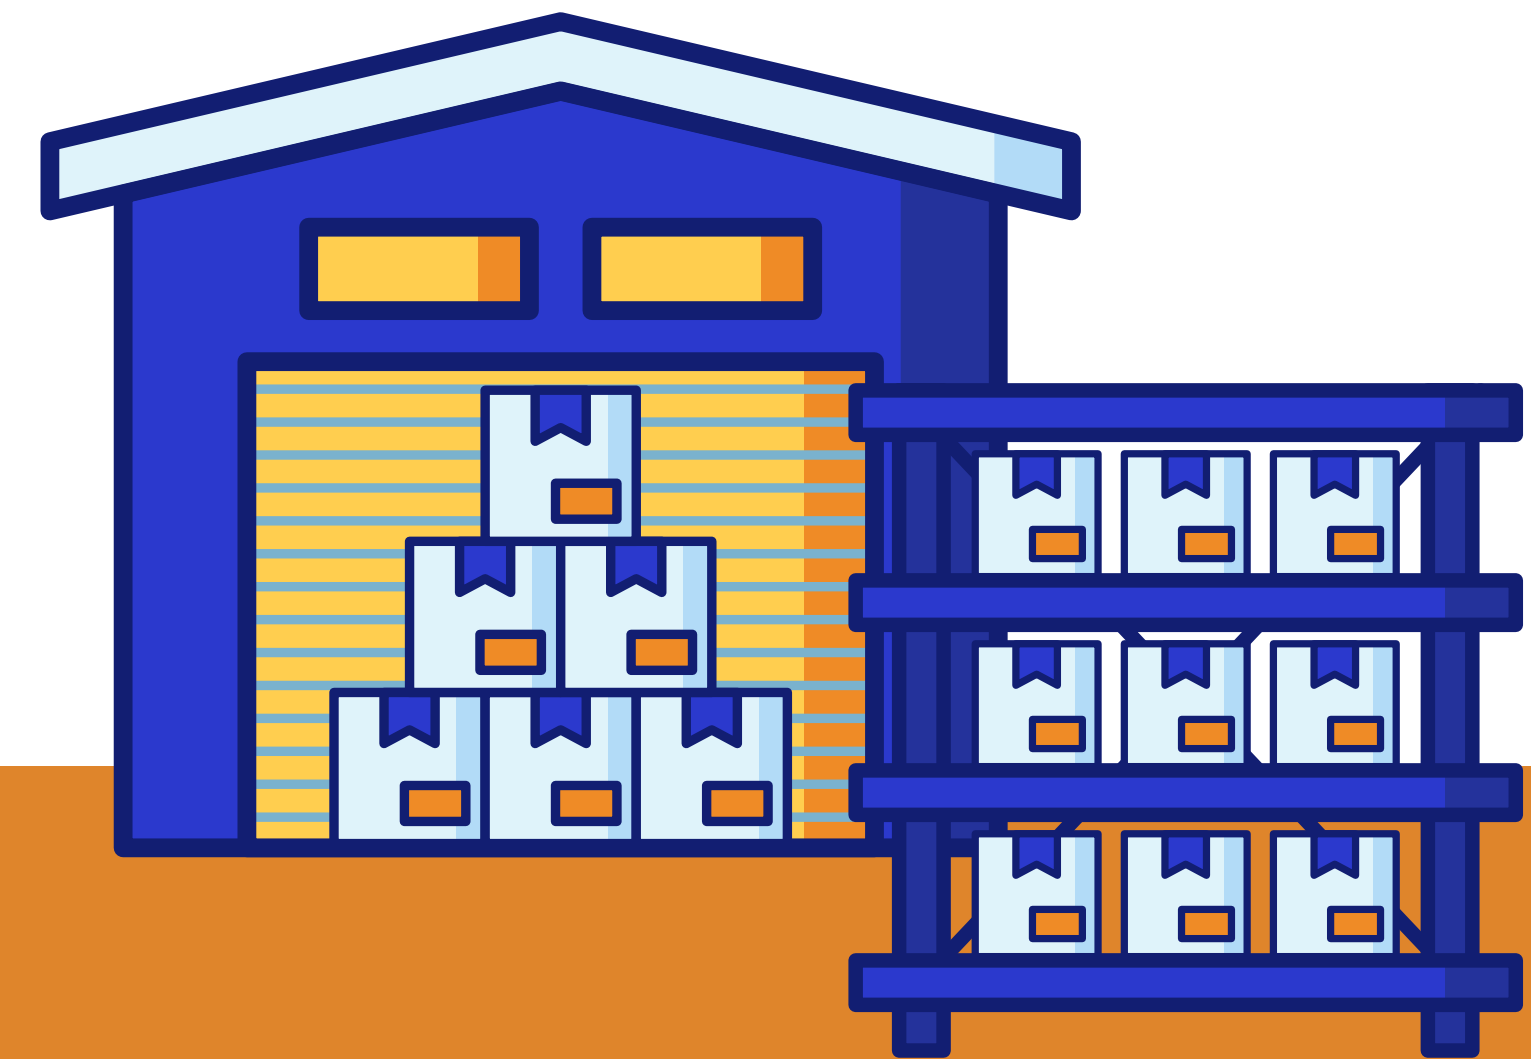

Reusable product &
packaging counts:
checkout / check in

Recent Use Cases

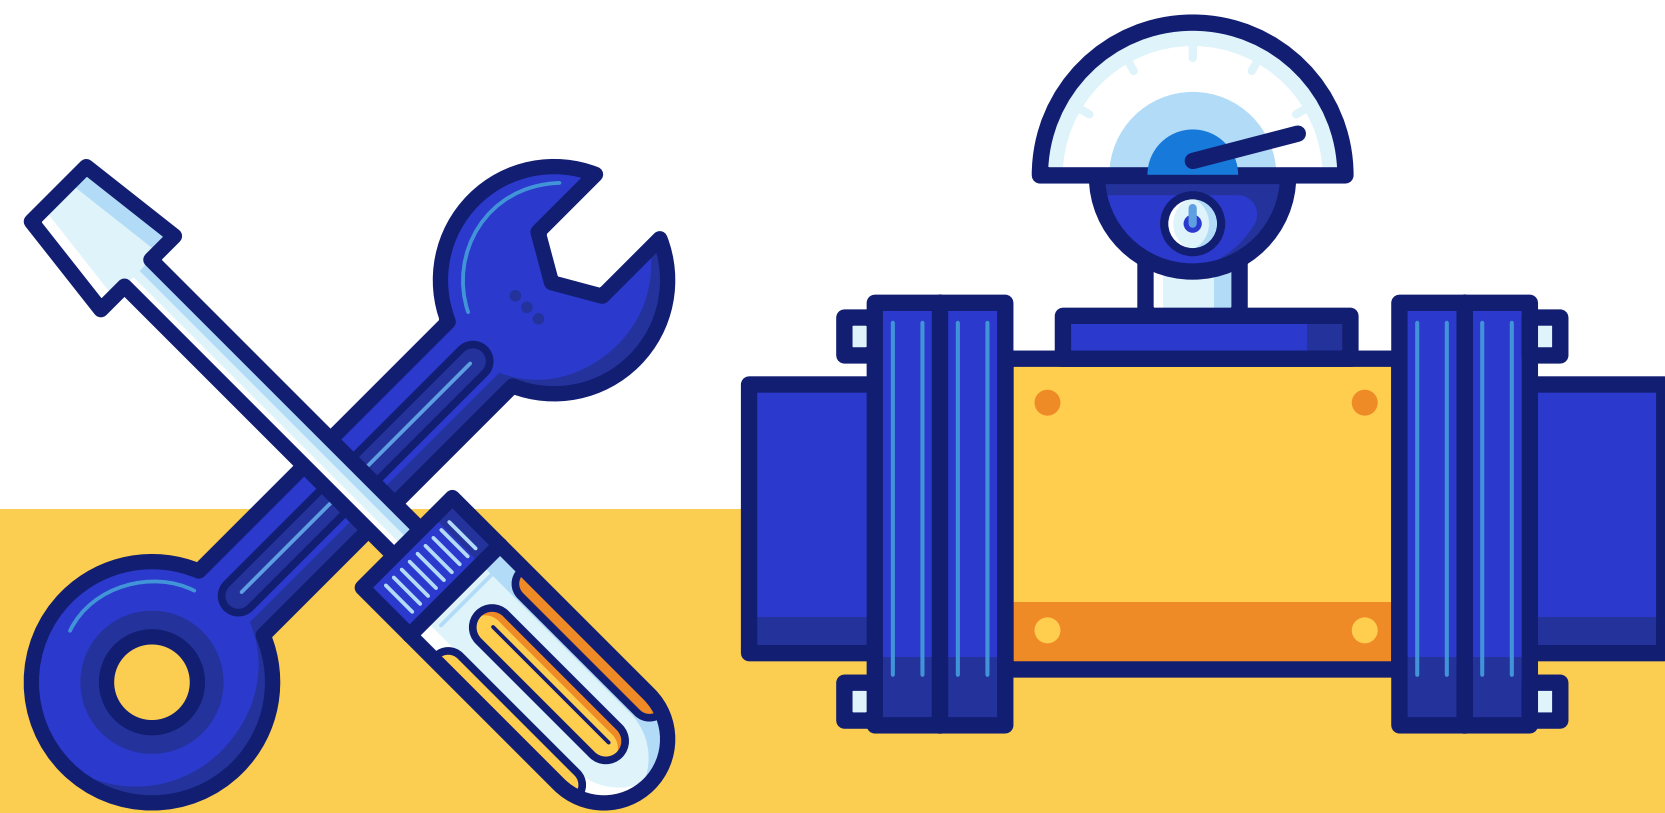

**On-site / remote
monitoring of equipment**

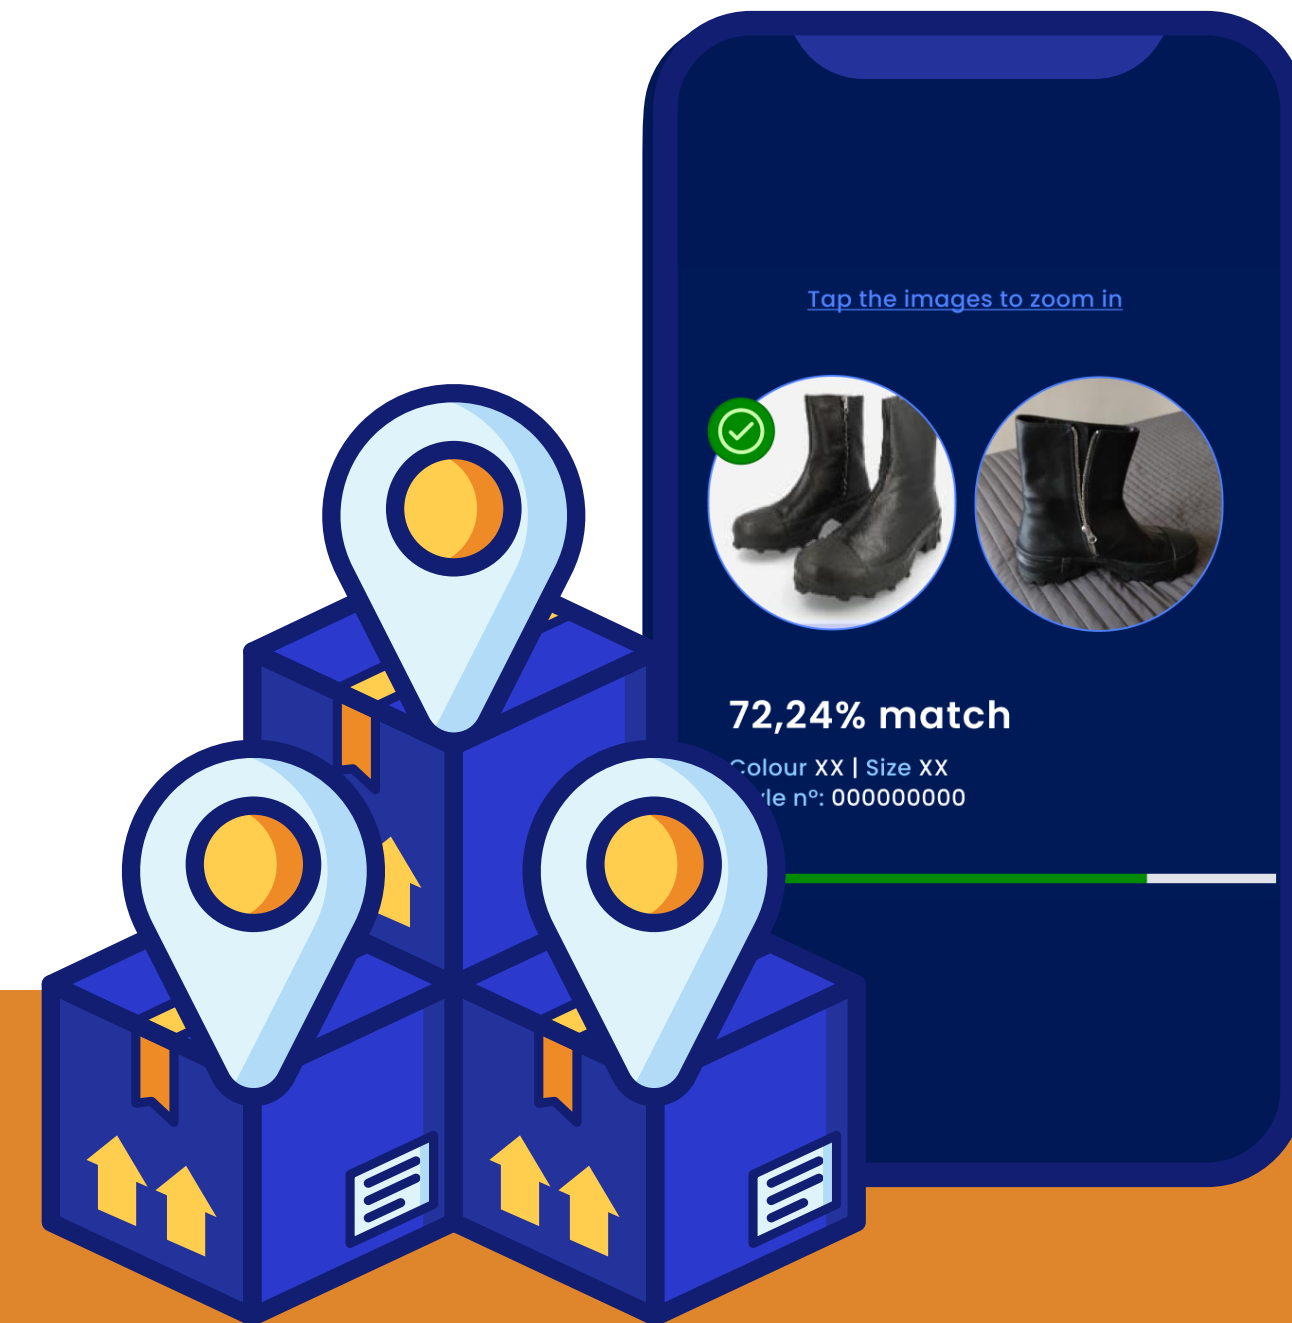

Warehouse optimization:
*picking and slotting and track
inventory (counts + location)*

Recent Use Cases

Asset maintenance:
*Tasks, condition, service needs
(preventive / predictive)*

**Classify e-commerce
returns using visual
recognition AI tool**

sc.tech

- **Asset Tracking**
- **Process Automation**
- **Operations Optimization**
