

## About Ainstein AI

Developed out of MIT, Ainstein offers solutions in Technology, Sports, Media, Finance and Corporate.

- Ainstein is pushing the boundaries of AI Reasoning and advancing AI's ability to reason and solve complex problems Autonomously.

**Ainstein Cubes improve decision making by orienting best and worst choices in an interactive gamified 3D matrix. Decision makers at all levels see their next best step in context, informed by massive underlying data.**

- With Ainstein, fans can follow their favorite Leagues, Teams and Players in Cubes, enjoying a gamified fun factor and new level of participation.
- Investors can elevate their game too. Cubes provide personalized guidance and greatly simplify understanding of complex market dynamics, always conflict-free. Investors can see how they are positioned and trust their own Portfolios, all in Cubes.
- Executive Management can benefit from Ainstein's AI-Level risk insights too, while simplifying collaboration up and down the organization.

**Ainstein is an AI phenomenon, "taking the work out" to make insights easy and effective, seeing insights others miss, testing conclusions and forecasts and always able to answer the most important question behind any decision: "Why?"**

- Ainstein brings a native understanding of the transformative effects of AI, strategic knowledge that can provide competitive advantages in multiple verticals.

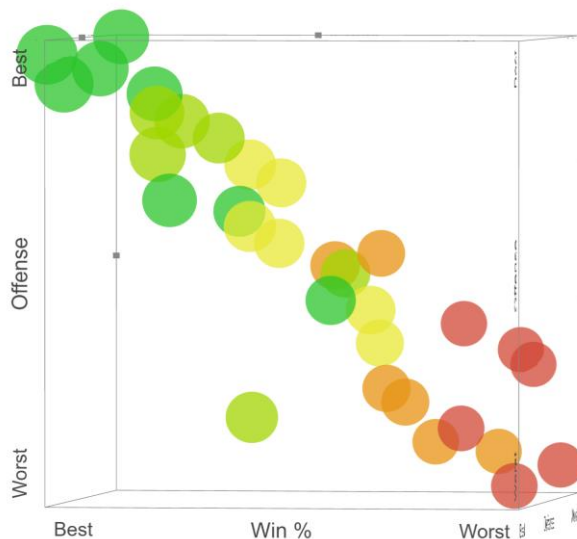

## Ainstein Cubes provide for Universal Excellence in Decision Making
