Azure Networking
 Azure Storage
 Azure Backup
 Azure Security

Transform your IT cost base to OPEX and experience the agility, scalability and predictability that the Microsoft cloud has to offer.

WHAT is Windows Azure Landing Zone Setup?

A simple, secure yet scalable basic configuration of Windows Azure

A typical IT manager is expected to manage cost while being responsive to unpredictable business needs. The Nexio “Windows Azure Landing Zone Setup” assists organizations in the journey to migrate their on-premises servers to Microsoft Azure while meeting availability, agility and scalability demands.

The objective of this offering is to provide customers with:

- || A simple basic configuration of Windows Azure that integrates with an on-premises datacenter
- || A base environment that can scale to cater for additional business requirements, should the need arise
- || All the necessities to support common security and data availability requirements

Kick-start your public cloud journey with a rapid deployment of Windows Azure
