"Position for an unpredictable future...
OPEX is key!!"

❑ Run your VMs only when required
❑ Pay for what you use
❑ Scale up or down, as business demands
❑ Predictable monthly charges without capital layout

Azure VM
Azure Storage
Azure Networking
Azure Backup

Transform your IT cost base to OPEX and experience the agility, scalability and predictability that the Microsoft cloud has to offer.

WHAT IS Nexio Azure Migration Assessment?
A solution that assesses the feasibility of moving a set of targeted servers to Azure

A typical IT manager is expected to manage cost while being responsive to unpredictable business needs. The Nexio Migration Assessment assists organizations in the journey to migrate their on-premises servers to Microsoft Azure while meeting availability, agility and scalability demands.

The objective of this assessment is to provide customers with a view of:
|| The feasibility of hosting a set of VMs in Azure as supposed to on-premises
|| The cost of hosting on Azure, accounting for the supporting Azure components
|| Recommendations for further optimization of VMs to Azure PaaS services

Reduce the *real cost*: your data center real-estate and supporting infrastructure

What's in the box?

✓ Migration compatibility per server
✓ Recommended Azure VM SKUs
✓ Monthly Azure cost estimate
✓ High-level migration plan
✓ Recommendations for optimizing your IaaS workloads to PaaS for further cost savings
✓ Quote for migrating your servers to Azure
✓ Max 100 Servers connected to the same routable network.

What's extra?

➢ Nexio as a Microsoft CSP can offer competitive Azure pricing, not available to direct Azure customers
➢ Leverage our Telco relationship to provide high-speed, managed connectivity to Azure
➢ Our team of firewall security experts can assist with perimeter security solutions that are cloud compatible
