- ☐ Stability
- ☐ Security
- ☐ Tried and trusted migration tooling & methodologies

Experience the stability, security and scalability of the cloud like never before.

What does this service offer?

A migration service that enables rapid transition to cloud-based email messaging

Microsoft Exchange Online is a hosted messaging solution that delivers the capabilities of Microsoft Exchange Server as a cloud-based service. It gives users access to email, calendar, contacts, and tasks from PCs, the web, and mobile devices

As a Microsoft Gold partner, Nexio has invested heavily in skillsets to enable and manage Microsoft 365 Services including Exchange Online. This offer enables customers to leverage the experience and expertise that Nexio has built to migrate mailboxes off a variety of email platforms and onto Exchange Online. Our migration approach is based on the standard Microsoft "cutover" migration approach which entails a complete migration of all mailboxes to Exchange Online. Contact your Nexio account manager for any specific requirements including hybrid configurations.

What's in the box?

- ✓ Migration planning workshop
- ✓ Migration of max 250 mailboxes
- ✓ Configuration of mail flow
