

Voice in the Cloud

"Your office is where you are"

- ☐ No customer infrastructure
- ☐ Priced as a Service
- ☐ Scale up or down, as business demands
- ☐ Competitive call rates

Experience enterprise telephony like never before with Microsoft's Phone System platform and transform the way your organization collaborate.

WHAT IS Nexio Voice in the Cloud?

[Think Microsoft Teams Telephony...for the South African Market.](#)

Nexio *Voice in the Cloud* is a telephony solution built upon Microsoft technologies that will fulfil the majority of today's telephony requirements. Priced as a service, delivered as a service!!

As a telco owned service integrator, Nexio is in a key position to deliver a true end-to-end telephony business solution that will radically transform the way that day to day business is conducted in your organization. Nexio has the ability, flexibility and industry know-how to successfully transition your legacy PBX business solution into a reliable, scalable and highly available enterprise grade cloud voice solution.
