# SmartCare EHR™

One system for all levels of care that can incorporate all of your business processes into a single solution, always evolving to meet your needs.

Streamline builds and maintains systems for some of the nation's premier behavioral health organizations, using the latest web-based technology. SmartCare™ is built to be the most open, and user-friendly, web-based EHR application on the market.

Core Functionality

- Intuitive system focused on one-click technology, and drills downs
- Fully web-based Electronic Health Record, no plug-ins
- Hosting infrastructure that maintains training, development and live environments
- Integrated platform for Outpatient, Inpatient, Residential, Primary Care and E-Prescribing

Key Features of SmartCare

- User specific dashboards that displays daily tasks and activities
- Performance monitoring dashboards for supervisors
- Clinical documentation made fast and easy
- Electronic signature captured via signature pad, includes ability for client to sign
