STRIPE OLT

MANAGED CYBER SECURITY OPERATIONS CENTRE

In today's interconnected world, secure, confidential and accessible IT is essential to nearly every aspect of society, underpinning our economy, government, national security, and daily lives. However, this digital dependency has fueled an unprecedented surge in cybercrime, costing the UK nearly £30 billion annually.

As attacks grow in volume, speed, and sophistication, the challenge for organisations to stay secure has never been greater. To combat these risks, many are partnering with managed security service providers (MSSPs) to proactively address key vulnerabilities, including:

- Persistent cyber security attacks

- At risk, legacy infrastructures

- Changing regulatory compliance requirements

- Financial constraints

- Lack of in-house resourcing

Our Managed Security Operations Centre combats these issues, by providing businesses of all sizes with enterprise-level threat detection and incident response capabilities, without the need for heavy internal resourcing.

Underpinned by Microsoft Sentinel, our award-winning SOC has been developed to operate within our customers own Microsoft 365 tenancies, enabling full access and visibility over the service we deliver, whilst additionally gaining deep insight into the toolsets we are using.

Offering a range of 24/7 managed security plans, our team have developed solutions that suit both need and budget.

SOC MONITOR (EDR)
Dedicated resource for event handling, endpoint detection and 24/7 monitoring.

SOC MANAGE (XDR)
Monitor plan, & dedicated resource for alert management and threat reporting.

SOC 360° (MXDR)
Manage plan, & ASR, CSA, Phishing Training, Vulnerability Assessments.

STRIPE OLT

A COMPLETE 360° SECURITY SOLUTION

Split into three core areas, our SOC plans cover a comprehensive set of core capabilities, to ensure our clients are supported when they need it most.

These capabilities include:

DETECTION & PREVENTION

- Real-time always-on monitoring

- Advanced threat hunting and detection

- Endpoint detection and response (EDR)

- Internal and external vulnerability scanning

- Migrate and sync relevant services from your existing platform, into Microsoft 365

- Microsoft security and compliance monitoring

RESPONSE & INVESTIGATION

- Investigation of risks

- Containment of threats

- Emergency, breach, and incident response

- Forensic investigation

REPORTING & COMPLIANCE

- Educational simulation phishing campaigns

- Vulnerability management

- Monthly vulnerability assessments

- Internal and external vulnerability scanning

- Regular product reviews and security roadmaps
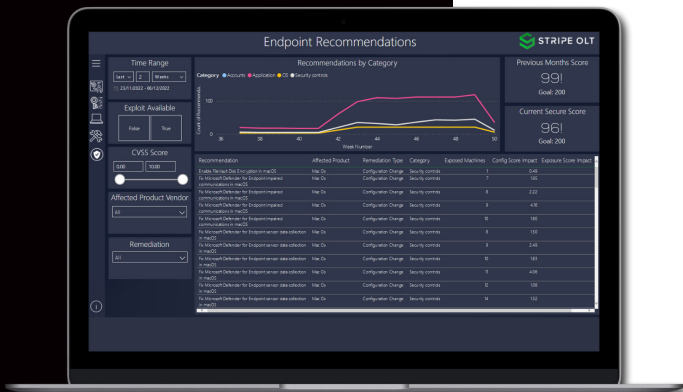

CHOOSE YOUR MANAGED SECURITY PLAN

STRIPE OLT

We've built these these core capabilities into our managed SOC plans, all of which have been developed to provide you with the security tools and expertise your business actually needs.

IN-HOUSE MANAGEMENT

SOC DEPLOY

With this solution, your team will be empowered with the security capabilities of Microsoft Sentinel, and gain the ability to remediate risks in-house.

We will deploy Microsoft Sentinel into your tenant, configuring the appropriate SOC tools and frameworks to enable alerts and detect malicious activity.

- Implementation of Microsoft Sentinel in your M365 tenant
- Configuration of key security toolsets
- Deployment of in-house SOC

MANAGED MONITORING (EDR)

SOC MONITOR

INCLUDES SOC DEPLOY

Built to suit IT leaders that need extra eyes on their environment, our team provide 24/7 security coverage.

· ·

- Dedicated Resourcing for Event Handling
- Endpoint Detection and Response (EDR)
- Proactive Threat Hunting
- 24/7 Monitoring and Support

MANAGED MONITORING & ALERTING (XDR)

SOC MANAGE

INCLUDES SOC MONITOR

For those that want to take their business security one step further and gain a dedicated, team to monitor and manage their security alerting.

· ·

- All the capabilities of SOC Monitor
- Dedicated Resourcing for Alert Management
- Threat and Vulnerability Reporting
- Cloud Security Baseline Monitoring
- Shadow IT discovery and Management

FULLY MANAGED (MXDR)

SOC 360°

INCLUDES SOC MANAGE

SOC 360°, delivers unparalleled security management. Your business will benefit from a fully managed security suite that detects, triages, and remediates threats in real time, in addition to user empowerment.

· ·

- All of the capabilities of SOC Monitor & Manage
- Phishing Attack Simulation and User Training
- Vulnerability Assessments
- Attack surface review
- Chief Security Advisor (CSA) insights

STRIPE OLT

UNDERPINNED BY DEEP TECHNICAL EXPERTISE

Our highly certified, UK-based SOC, is comprised of ex-military personnel, cyber security analysts, SIEM engineers, ethical hackers and threat intelligence analysts who, as a team, are a virtual extension of our customers' in-house IT security resource.

Utilising a range of bespoke toolsets and configurations, underpinned by Microsoft security technologies, our experts protect, detect and respond to cyber security threats in real time, across your entire M365 Environment.

WHAT TO EXPECT

Transitioning to a new supplier or service can feel daunting, but our streamlined onboarding process is designed to make it simple.

Through a carefully staged approach, we partner closely with you to fully understand your organisation's needs, ensuring every aspect is set up seamlessly so that you enjoy a high level of service from day one.

Throughout your journey with Stripe OLT, you'll have dedicated resources at every step. During onboarding, a dedicated project manager will guide you, and once live, your Partner Success Manager will provide consistent support and a single point of contact to keep your goals on track.

PROJECT INITIATION

Internal Kick Off
Our technical and operations teams meet internally to discuss project scope; exploring timeline, dependancies and risks.

Client Kick Off
Your organisation and Stripe OLT meet to discuss the full SOC and infrastructure scope, to confirm next steps, timeline, risks and dependancies.

Discovery & Audit
Our team begin the start of their technical engagement, with a view to document and create a library of technical assets. This is done to ensure the scoped infrastructure is ready for onboarding.

PROJECT ONBOARDING

Provisioning & Ingestion
During this phase we provision Azure Sentinel within your estate, setting up the technical foundation. Here our team set up log ingestion, log collectors and build out playbooks.

Gap Analysis
Here our team perform a security gap analysis on your infrastructure. The core focus here is to document and highlight security risks before go live.

PROJECT LAUNCH

Gap Reporting
The Gap Analysis findings are presented to your team with a view to improve your security posture, idenfity quick wins and agree next steps for long-term risk remediation.

Service Go Live
Security monitoring begins. Your organisation will be provided with formal documentation including user guides. We'll schdule upcoming Quarterly Business Reviews and you'll be introduced to your Partner Success Manager.

STRIPE OLT

HEAR DIRECTLY FROM OUR CLIENTS

"

Stripe OLT's expertise and prompt response to any issues have not only strengthened our security posture but also provided peace of mind to our entire organisation. We are grateful for their outstanding support protecting our vital data and infrastructure
Director of IT
National Healthcare Organisation

We now know we've got eyes on our assets 24 hours a day, 7 days a week and with that peace of mind, we can focus on other business critical tasks. The Stripe OLT Sec Ops team are professional, knowledgeable and always available when needed.

CTO
Leading Finance Specialist

With trust comes responsibility, and one of those responsibilities is to make sure we look after all of the information about our clients. Having Stripe OLT look after and help protect that, is a key part of maintaining and continuing to earn the trust of our clients.

"

WHY CHOOSE STRIPE OLT?

24/7 COVERAGE

Using the latest Microsoft security and detection technologies to hunt for and eliminate malicious actors before they pose a threat to business, we offer round-the-clock monitoring of networks, systems, and data to detect and respond to security threats as soon as they occur. We're here to alleviate the pressure of hiring and covering staff inhouse, minimise the potential impact of security breaches, and protect against attacks from escalating into large-scale incidents.

UK BASED SOC TEAM

With offices in London, Bristol and Manchester, our team are based across the UK, working day and night to protect our clients from global threats.

COST SAVINGS

By outsourcing security requirements to an MSSP like Stripe OLT, organisations can save on the costs associated with hiring and training in-house security personnel, purchasing and maintaining security equipment and software, and dealing with security incidents. For SME's we estimate building a small, in-house security operations centre can cost upwards of £300,000.00 - with us you can benefit from a saving of over 70%.

SCALABILITY

Our flexible Microsoft cloud solutions can be customised to meet the changing needs of any organisation as it grows and evolves. In utilising the cloud, you can scale up or down as needed, without having to invest in additional resources and only pay for what you use.

STRIPE OLT

ABOUT US

Proudly providing services that are underpinned by a 20-year legacy of expertise, and strategically guided by highly-certified consultants, we support critical infrastructures in established organisations.

As a trusted MSP and MSSP, we deliver tailored solutions that address the unique challenges of an ever-evolving technology landscape. Specialising in Microsoft cloud and security technologies, our commitment to Microsoft technology is unwavering. We seamlessly integrate it into our 24/7 operations, offer it as a valued solution to our clients, and are deeply passionate about its potential to drive transformation.

Leading organisations trust us to be the strategic partner they need to stay secure, agile, and prepared for the future.

DELIVERING RESULTS FOR LEADING ORGANISATIONS

Microsoft Solutions Certified Partner

At Stripe OLT, over the last three years we've invested heavily in building our Microsoft certifications and as a result, we are now one of the UK's leading Microsoft partners in cloud and security. Our team have the power to leverage the full capabilities of both Sentinel and the Modern Workplace - empowering our clients with the Microsoft solutions they need to take back control of their IT infrastructures.

CREST - Penetration Testing Certified

In achieving this globally recognised accreditation, we've positioned ourselves as a leading provider of penetration testing services in the UK. In undertaking these stringent assessments we have demonstrated that our business processes, data security and testing methodologies meet the highest standards.

ISO 27001 Accredited

The ISO 27001 certification is a framework that helps organisations establish, implement, operate, and manage their information security; acknowledged and accepted internationally as a leading data security accreditation.

Computing Cloud Excellence Awards Winner

At Stripe OLT, our mission is to provide secure, cloud-first business technology that enables transformation, protects the workplace and delivers results. With two consecutive wins at the awards in 2021 and 2022, we have been recognised as both a leading MSP & MSSP.

Megabuyte 100

The MegaBuyte100 awards are renowned for spotlighting the best of the UK's tech sector. Through exhaustive research backed by Megabuyte's leading analysts, they celebrate high-performing scale-ups, dynamic mid-market players, and innovative firms. In 2024 we were named as a top 50 emerging star, highlighting our expertise within the UK technology landscape.
