

Agent 365 Governance Model Design

Microsoft
Agent 365

Enterprise Agent Management & Security Framework

Service Description

As organizations scale agent deployment, uncontrolled sprawl creates security blind spots and regulatory exposure.

This engagement delivers a tailored governance framework for AI agents under the Microsoft Agent 365 control plane.

Service Type: Implementation | Duration: 3–4 weeks | Fixed Price

Engagement Scope

- Architecture & Design
- Policy Development
- Roadmap Planning

Key Deliverables

- Agent Landscape Assessment
- Governance Framework (5 pillars)
- Agent Lifecycle Policies
- Role-Based Oversight Model
- Implementation Roadmap
