

Boost your internal communication with Teams Company Communicator app

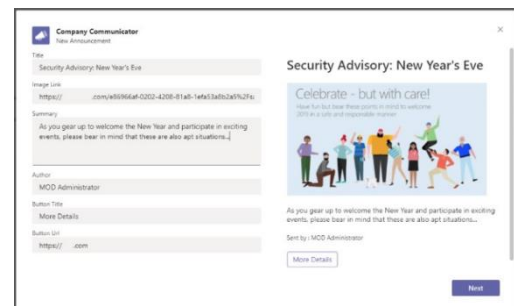

Communicate better with Company Communicator

Company Communicator is a custom Teams app that enables corporate teams to create and send messages intended for multiple teams or large number of employees over chat allowing organization to reach employees right where they collaborate.

The app provides an easy interface for designated users to create, preview, collaborate and send messages. It's also a foundation for building custom targeted communication capabilities, such as custom telemetry on how many users acknowledged or interacted with a message.

Company Communicator has multiple scenarios:

- New initiative announcements
- Employee onboarding
- Modern learning and development
- Organization-wide broadcasts

Sulava will help you to plan, create, and deploy the app to your environment

We have been helping customers to deploy the Company Communicator to multiple different environments and business scenarios. We offer the Company Communicator deployment project with fixed price of 13,000 AED

Week 1
