

Managed Security Services by Sulava

Continuous development

Sulava is with you every step of the way to ensure your environment remains secure as threats and protections evolve

Always monitored and supported

Our SOC and dedicated analysts will keep you and your environment always up-to-date.

Sulava workbook library

You will get full access to Sulava Sentinel workbook library and can utilize the latest threat hunting methods created by Sulava.

Uncovering of threat vectors

Our security process will help your security team to uncover the latest threat vectors

From incidents to solutions

Custom solutions will be built based on most prominent incidents to focus on the security issues that cause most risk.

Training is key in people journey

Leveling up the skills of the workforce is paramount in implementation of security. Training and creating awareness is constant and continuous.

Governance and compliance

Microsoft XDR will bring a new set of challenges in running the environment. Sulava will make sure that governance and compliance are managed properly.

Responsible and sustainable

Sulava will help you ensure a secure and sustainable environment long-term
