

Microsoft Metaverse by Sulava

JANUARY 2022

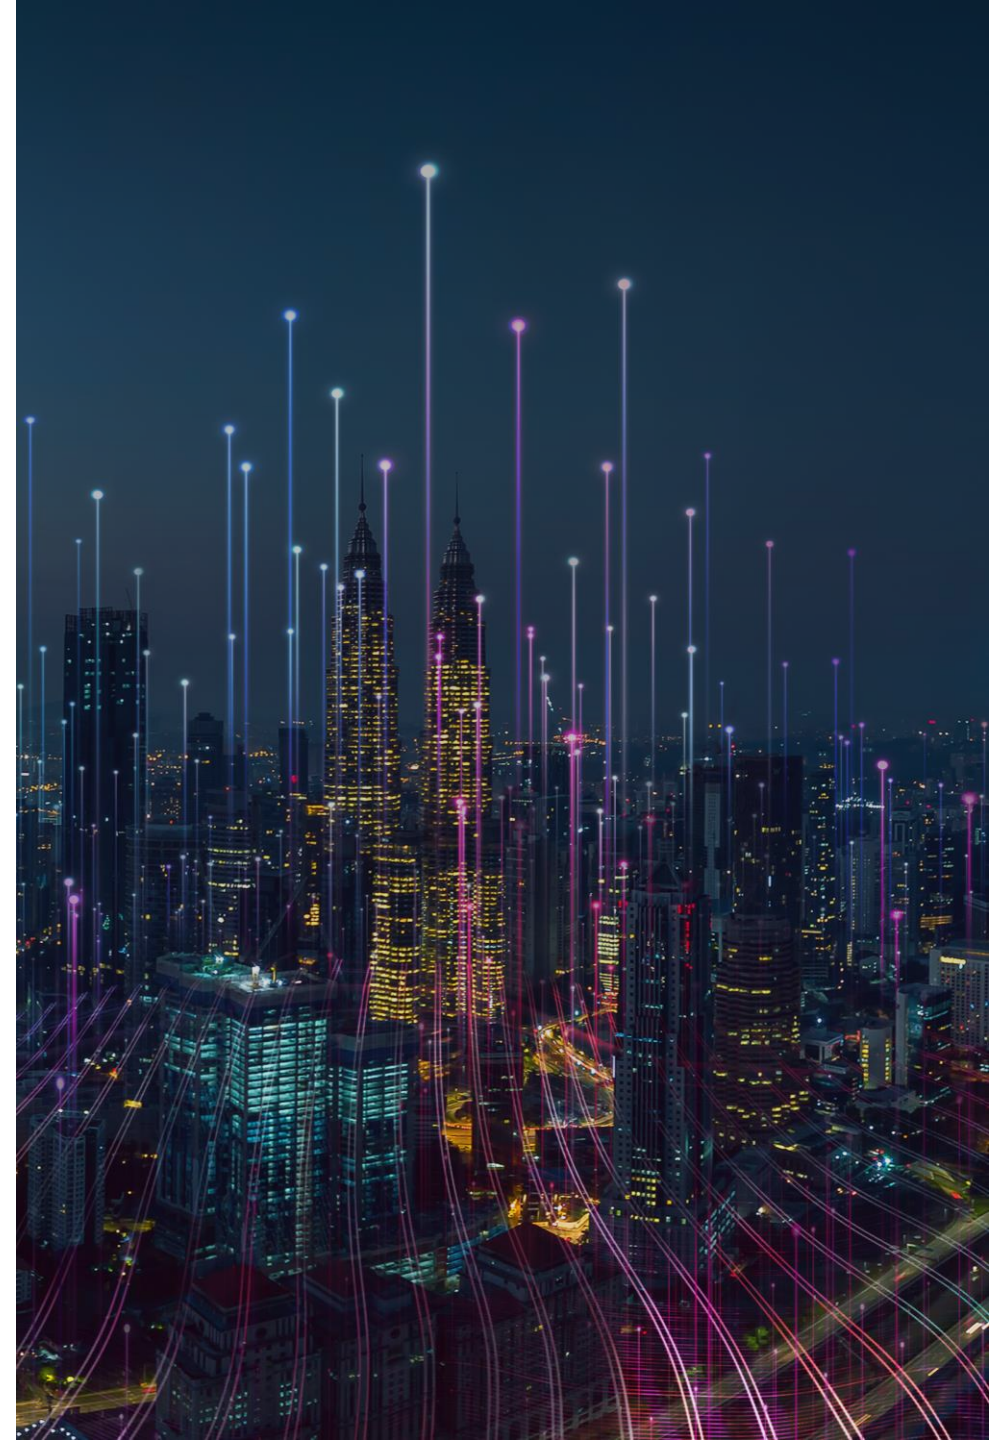

“Within the next two or three years, I predict most virtual meetings will move from 2D camera image grids—which I call the Hollywood Squares model, although I know that probably dates me—to the metaverse, a 3D space with digital avatars”

- Bill Gates

**Microsoft Metaverse is a game changer
on the way we work in the same way the
internet and cloud impacted our lives**

Future of work requires new practices, ideas and tools

- Hybrid work is here to stay and the default
- Work is more asynchronous than today
- Ability to respond to rapid changes
- Learning, onboarding and working together from anywhere
- Digitalization continues as Metaverse is the next internet
- Employees expect better tools and practices

Metaverse enables

- Spontaneous interaction with colleagues
- Innovation, support & co-creation globally
- Better ways to train, learn, onboard and lead
- Utilization of Digital Twins in a visual way
- Virtual company spaces, rooms and offices
- New business services and models
- Cost savings
- Higher employee satisfaction and retention
- New kind of attraction to new customers and employees

Microsoft Metaverse is built on Microsoft stack

- Microsoft Teams with Mesh for Teams as the common user interface
- HoloLens and other Mixed Reality devices for immersive Experience
- Power Platform to enabled low-code customizations, integrations and automated processes
- Digital Twins and extended customizations are powered by Azure Services
- Connected Spaces for new kind of real world and metaverse experiences

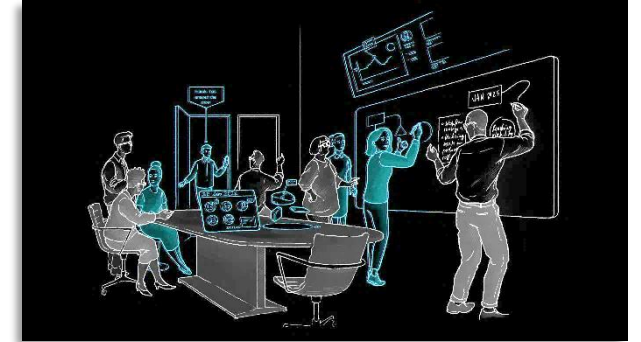

Some collaborative Metaverse opportunities with Mesh for Teams

Remote expertise

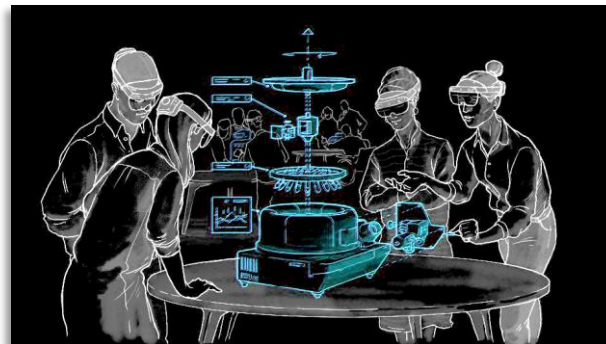

Train/learn together

Immersive meetings

In-situation information

Design together

Connect and create
