VAST SYSTEM DEVELOPMENT SERVICES

Variable Automated Service Tools (VAST) System Development Services

STS proprietary Variable Automated Service Tools (VAST) services standardize procedures, modernize administration, and systemically organize data within a secure Microsoft O365 architecture.

Customizing this architecture doesn't have to be complicated nor costly. Servicing digital business transformations through the implementation of software and automation, our VAST services can support your organization in ideating a solution leveraging commercial-off-the-shelf tools like SharePoint, TEAMS, and Power Platform that will optimize, simplify, and control your processes. Furthermore, we can assist in deploying this new technology and facilitate organization-wide adoption of the improved process.

STS has engineered a portfolio of tools and actively maintain comprehensive IT/Digital workspaces for our customers. VAST supports the ideation and delivery of customized solutions to automate tasks, reduce process redundancy, streamline communication, and securely deliver and store data for our government customers. STS is dedicated to systems performance and improvements. Our SME's take every consideration when automating processes, working with the users and key decision makers to identify opportunities for consideration. We pay particular attention to process deviations to ensure compliance with all project requirements, while working to ensure users can seamlessly collaborate.

Potential VAST Applications and Automation Opportunities:

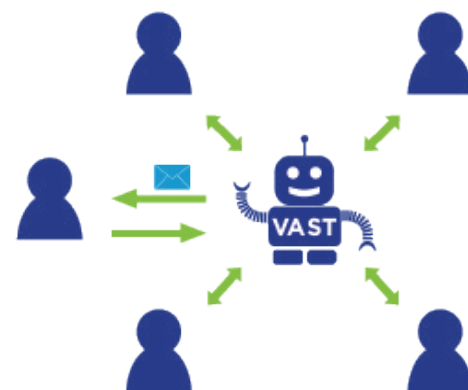

- Automated Dashboards & Data Analysis
- Approval Processes & Signature Requests
- CDRL Reminders & Confirmation Tracking
- Auto-Generated Document & Library Structures
- Automated Record Analysis & Tracking
- Project Data Oversight & Communication
- Configuration & Control Required Processes
- Version Tracking & Archival
- Secure System or Database Access

VAST Service Automations for Your Business

Customizing system architecture does not have to be complex or costly. STS VAST services leverage commercial-off-the-shelf software to automate, optimize, and simplify business processes within secure controlled environments. STS developers work with key process owners to understand and build solutions to streamline communication and enable collaboration. We deliver user-friendly systems designed to follow strict processes requirements, tailored to meet your unique business needs, control deviations, and ensure consistent delivery of service.
