AWARDED TO TOP 1% OF PARTNERS

Sunrise Copilot Accelerator

# How do I actually leverage Copilot?

AI and Copilot offer a tsunami of interest and opportunity, but many struggle finding real-world applications.

Sunrise tackled this head-on with a successful internal Copilot deployment. This value is now available to our customers.

## AGENDA

- Sunrise Internal Case Study
- Packaged Offering
- Benefits
- Next Steps

# Sunrise Internal Case Study

Teams-embedded Copilot for  
our Finance team.

## Problem

Desire to put Copilot to work. Manual, repetitive tasks verifying and processing timesheets.

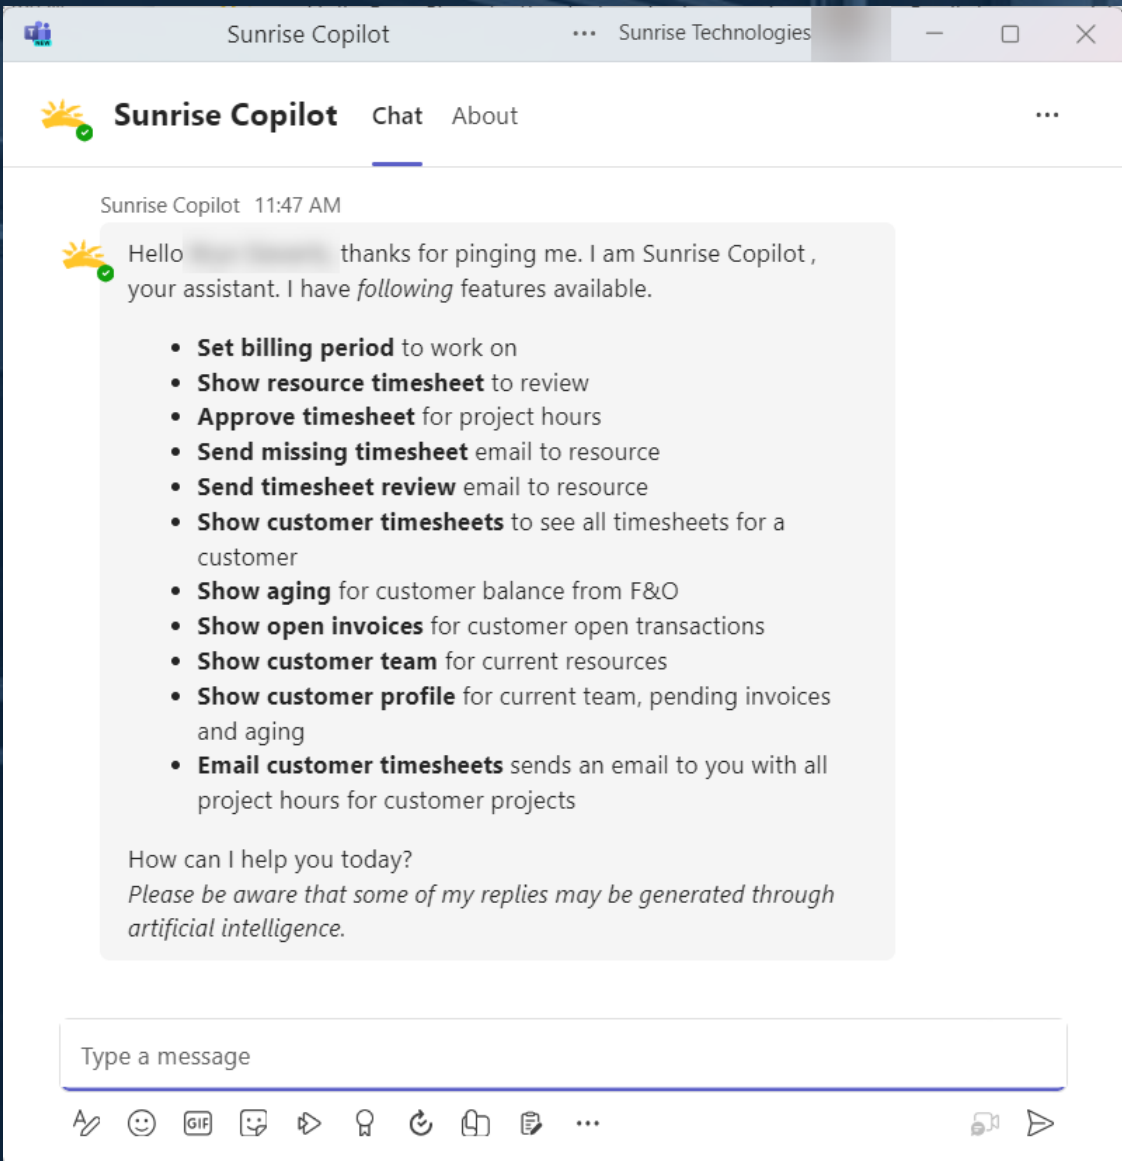

## Action

Designed and implemented "Sunrise Copilot," using AI Copilot Studio with Teams chatbot with 14 prompts (queries + actions) across 4+ systems.

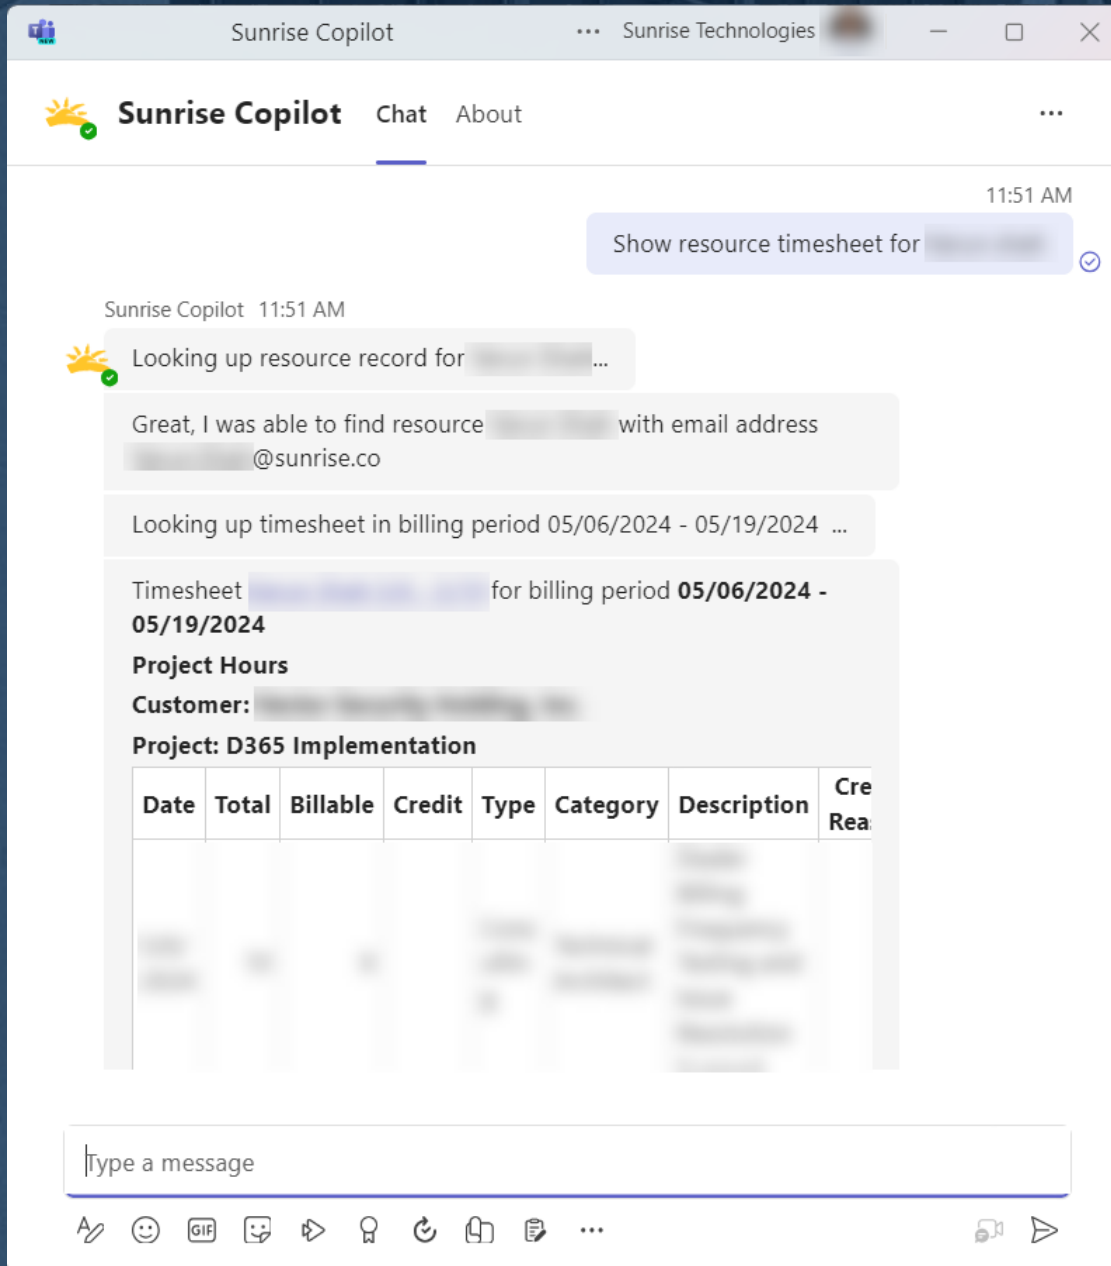

## Result

160+ hours saved annually. Fewer clicks, faster access to info, automated emails, and follow-on phases for additional opportunities.

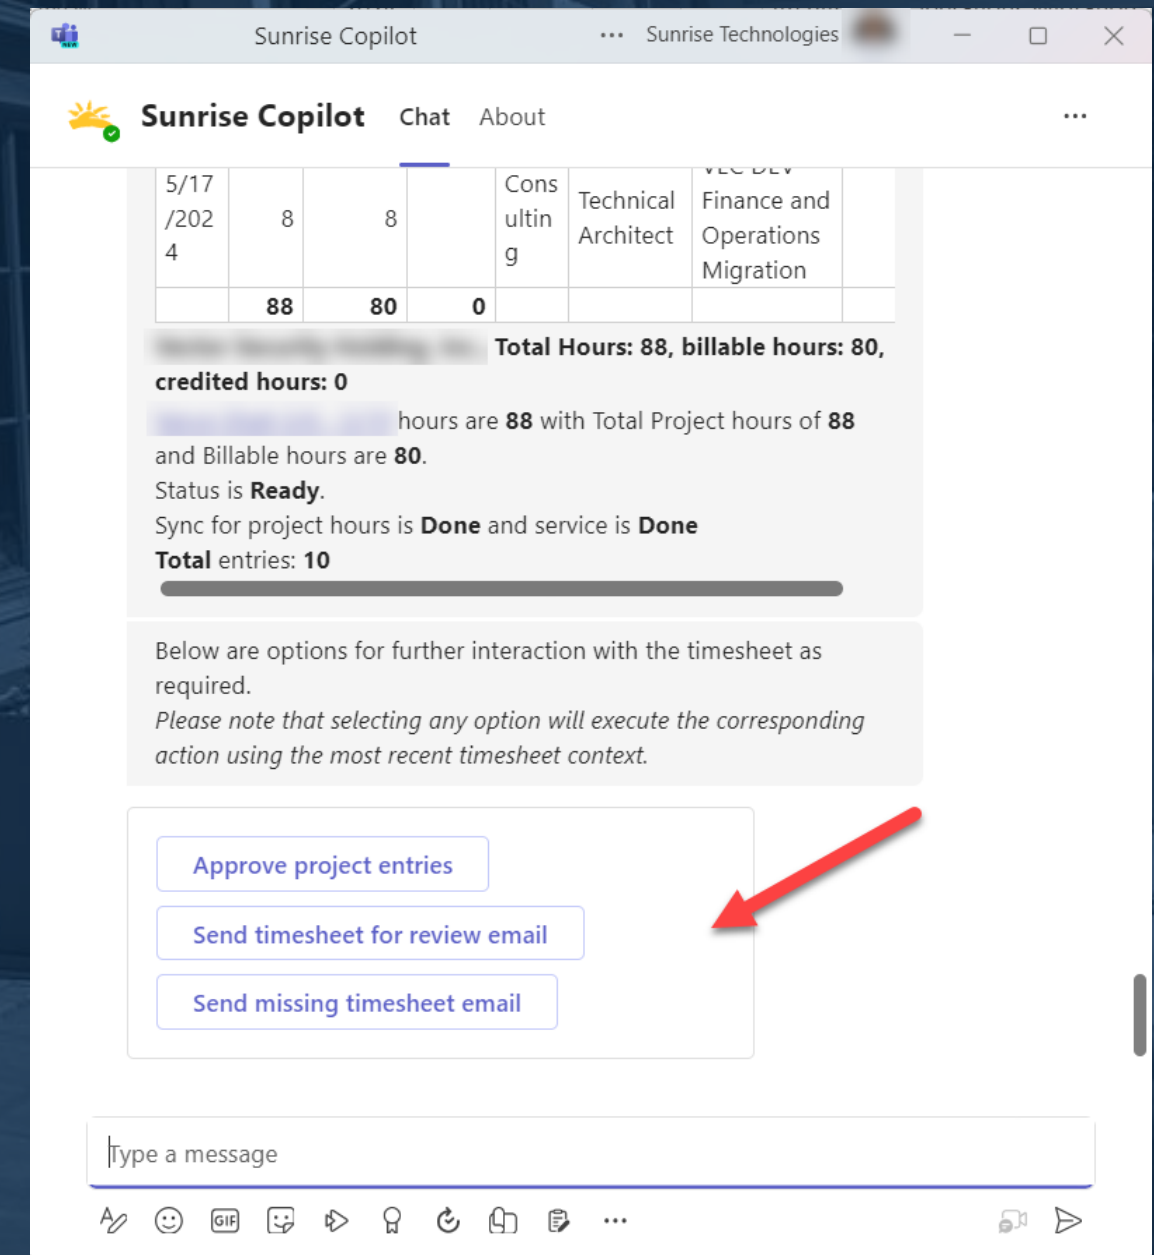

**User Interface = Teams**

Query

## Actions

**334**

Timesheets Processed  
in a Day

**81%**

Reduction to Review  
Timesheets

**160+**

Hours Saved Annually

*“Phase 2 is really exciting because it allows me to quickly look up things that took me several minutes, which doesn’t seem like a big deal at first. But when you think about doing these things every day, it can be a pretty vast improvement.” -- Heather Essic, Chief Administrative Officer.*

**“Instead of hunting through 4 systems for answers, Copilot delivers exactly what I need—in real time. It’s not just faster—it gives me the clarity to make decisions on the spot.”**

**- Heather Essic, Chief Administrative Officer**

# Microsoft Copilot Accelerator Package

BASE

- Setup Licenses
- Setup Environment
- Setup Security and Users
- Setup Solution (Test ready)
- Configure two F&O-based chatbots

Cost: \$5,500 deployment + \$200/month\* licenses

~\$2K-10K

# KEY BENEFITS

**ACCESSIBLE**

**ON-GOING GROWTH**

**AUTOMATED**

**TANGIBLE VALUE**

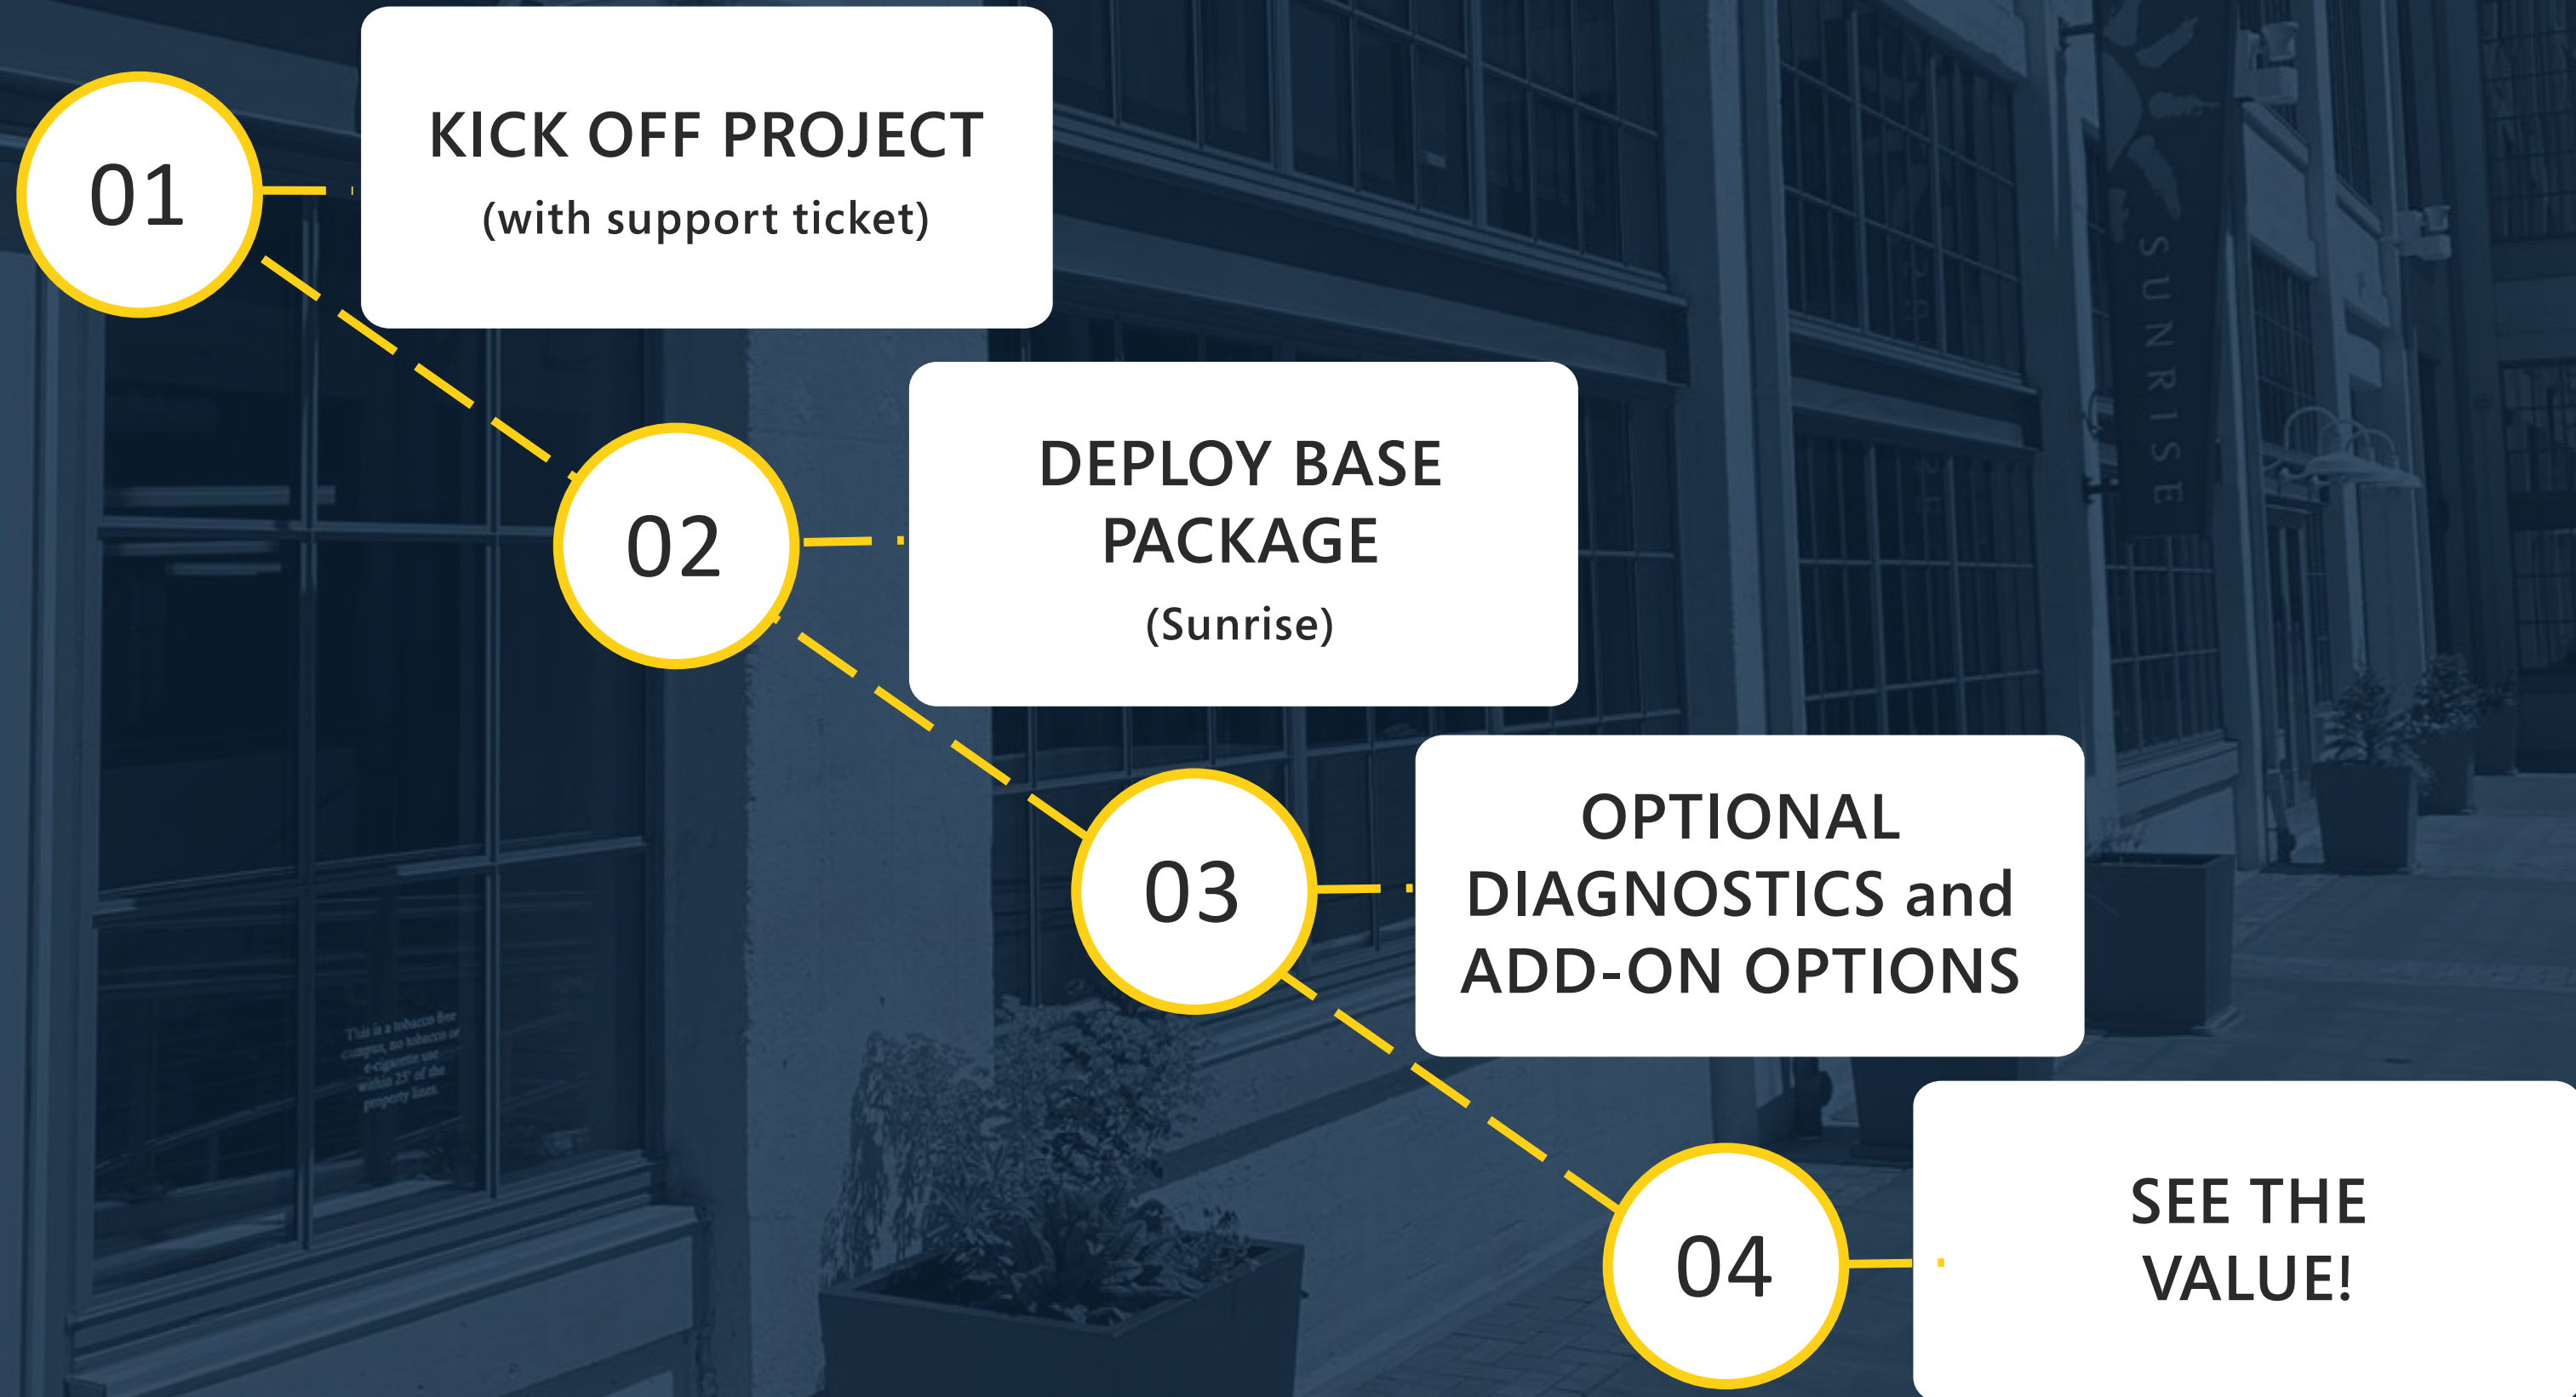

**REDUCED  
TRAINING**

**EARLY ADOPTION**

# HOW DO YOU GET STARTED IMPLEMENTING COPILOT?

Here's what next steps look like if you're ready to bring Copilot to your business:

# Is your organization ready to embrace AI?

## Design your Copilot with Sunrise. Infuse AI into your everyday workflows.

Microsoft has the platform, security, and capabilities to reap all of AI's benefits. Copilot uses natural language processing technology to analyze your input and generate high-quality text. Prompt Copilot with a sentence or just a keyword and it will offer you suggestions to continue or complete a task. Train Copilot to automate redundant or repetitive tasks to free up your team for more creative work.

*Sunrise is a premier provider of Microsoft Dynamics 365, Azure, and Power Platform solutions for brands, retailers, and manufacturers. Contact us to learn more about how our implementations offer results without the extra cost and complexity. Visit [www.sunrise.co](http://www.sunrise.co) or contact us at [marketing@sunrise.co](mailto:marketing@sunrise.co)*

### Microsoft Copilot for Dynamics 365

AI capabilities in Microsoft Dynamics 365 Finance, Supply Chain, Sales, Customer Service, and more make staying proactive and productive easier than ever.

- Create marketing journeys and draft copy using natural language.
- Draft emails to customers and vendors using relevant data from Dynamics 365 Sales, Finance, Customer Service, and more.
- Ask Copilot for help and reference documentation within Dynamics 365.

### AI Readiness Assessment

Do you have a vision for the processes that Copilot can improve, or are you unsure where to start? Sunrise can help you assess your organization's AI readiness. We'll guide you through a business and systems model assessment to help you identify the areas where Copilot can streamline operations, remove manual processes, and eliminate redundant tasks.

**-- Schedule a FREE\* assessment today. --**

*\*Sunrise has a limited number of vouchers available from Microsoft to cover the cost of the assessment.*

### Copilot Accelerator Package

After the AI assessment, work with the Sunrise consulting team to implement a custom Copilot at your organization with our Copilot Accelerator Package including:

- Licensing
- Environment setup
- Solution deployment (Test)
- Solution deployment (PROD)
- Configure two F&O-based chatbots
- Optional Add-ons

#### Base Package Cost:

\$5,500 deployment + \$200/month\* Microsoft licenses

### Sunrise Copilot Case Study: Measurable Results

Sunrise executives were eager to test out Microsoft Copilot's AI before offering it to customers. The finance department felt like the most obvious place to start automating manual and repetitive tasks like verifying and processing timesheets with AI. Sunrise's Director of Product Management shadowed the finance team for 2 days to understand their business processes and identify areas where AI could automate or expedite tasks. After 20 days, the consulting team had a copilot solution up and running that reduced the finance team's manual processes by 81%. To read the full case-study, visit the [Sunrise Copilot landing page](#).
