

# Volt Technologies: Volt 365® Apparel Overview

# Volt 365<sup>®</sup> Apparel

Industry Specific IP for Fashion, Footwear, & Apparel Brands

## Building a Competitive Advantage with **Control & Visibility** in Dynamics 365

Imagine your business as a puzzle with hidden pieces. We can't solve the puzzle instantly, but we can offer hints – like guiding you through solving it. Just as a gardener tends to specific plants, we identify what needs attention in your business. Introducing Volt 365 Supply Chain, your business toolkit. Think of it as a finely tuned instrument for Microsoft Dynamics 365. It's evolved over decades, improving planning, inventory, and logistics. Plus, it's cost-effective, acting like an all-in-one Swiss Army knife of features for your business needs

The screenshot displays the Volt 365 Apparel interface within a Microsoft Dynamics 365 environment. The main table lists items with columns for Type, No., Item Ref., Variant Code, Color, Size, Description, Custom Embroid., Location Code, Quantity, and Allocation. Below the table, there's a 'Top Performers' section with a list of items and their sales figures. To the right, a 'Summary' panel provides an 'Allocation Summary' and 'Supply Sources'.

Type	No.	Item Ref.	Variant Code	Color	Size	Description	Custom Embroid.	Location Code	Quantity	Allocation
Item	K-0200		V-00358	BLACK	XL	BLACK : XL		US 3PL	40	✓
Item	K-0200		V-00360	GREY	L	GREY : L		US 3PL	20	✓
Item	K-0200		V-00361	GREY	M	GREY : M		US 3PL	15	✗
Item	K-0200		V-00369	GREY	S	GREY : S		US 3PL	35	✓
Item	K-0200		V-00367	RED	XS	RED : XS		US 3PL	20	⚠

**Top Performers**

Rank	Item	Sales
1	Classic Polo - Black M MP - 2024-0010BLK-M	\$27.4K 342 units

## Inventory Seasonality Management

Stay ahead of seasonal shifts. Volt IP empowers you to anticipate and adapt to changing demand patterns — optimizing inventory, production, and distribution so you're always stocked right, not overstocked.

## Multi-Dimensional SKU Management

Simplify complexity. Manage thousands of SKUs effortlessly with Volt IP's intelligent structure, designed to streamline inventory control, reduce waste, and deliver exactly what your customers need, faster.

## Easier Order Entry

Speed through sales and purchasing. With Volt IP's transaction matrix and Excel import/export templates, you can process orders in seconds — eliminating manual work and boosting productivity across your team.

## Soft Allocation

Take control of constrained supply. When demand exceeds supply, Volt IP helps you intelligently prioritize orders, allocate inventory strategically, and make data-driven decisions that keep your business moving.

## Automated Order Release Management

Fulfillment at the speed of automation. Volt IP ensures fast, error-free order processing with automated order releases — reducing delays, improving accuracy, and maximizing customer satisfaction.

## Background

Spiritus Systems is a U.S.-based manufacturer of mission-critical equipment serving military and tactical markets, where accuracy, compliance, and operational reliability are non-negotiable. As the business grew and product complexity increased, leadership needed a modern ERP platform to support both manufacturing execution and financial oversight.

## Business Challenges

A failed ERP implementation left Spiritus without a reliable system to manage inventory, production, and financials, creating operational disruption and eroding user trust. Manual workarounds, limited visibility, and lack of system adoption made it difficult to meet compliance requirements and confidently scale operations.

## Solutions Delivered

Volt Technologies re-implemented Microsoft Dynamics 365 Business Central, stabilizing core financials while delivering manufacturing, inventory, and compliance-ready workflows tailored to Spiritus' operational realities. The new system restored confidence, unified data across departments, and provided a scalable foundation to support continued growth and mission readiness.

ALLURE BRIDALS®

## Background

Allure Bridals is a leading global designer of bridal and formalwear, headquartered in Memphis, Tennessee, serving retailers across international markets. Known for its expansive collections and seasonal designs, the company relies on precise coordination across design, purchasing, production, and distribution to deliver premium gowns worldwide.

## Business Challenges

While Allure had already adopted Microsoft Dynamics 365 Business Central, the core system alone did not fully support the complexities of bridal and fashion operations. Managing style variants, size and color matrices, seasonal collections, and production workflows limited visibility and slowed processes critical to meeting retailer demand and maintaining service excellence.

## Solutions Delivered

Volt Technologies enhanced Business Central with additional apparel-specific functionality, aligning the system to fashion industry best practices. The solution modernized style and variant management, streamlined purchasing and production workflows, and improved data accuracy — giving Allure a scalable, industry-aligned ERP foundation to support long-term growth and evolving market demands.

## Background

Goodwill of Central & Coastal Virginia (GCCVA) operates a large nonprofit and retail network, serving communities through job training, employment placement, and other critical programs. With numerous retail locations and donation centers, their mission-driven operations rely on both retail efficiency and strong back-office processes.

## Business Challenges

GCCVA's legacy systems created silos between financials, retail operations, and donation processes, resulting in reporting delays and inefficiencies. These challenges limited data visibility, slowed decision-making, and made it difficult to scale operations while maintaining transparency for stakeholders.

## Solutions Delivered

Volt Technologies implemented Microsoft Dynamics 365 Business Central, creating a unified platform for finance, retail, and donation center operations. The new system streamlined reporting, improved real-time data access, and established scalable processes to support GCCVA's growth and mission impact.
