

SUNSPOTS.cloud is a SaaS Multi-Cloud infographics Mapping & Management AI Platform for real time Governance & Security.

We provide our customers with the ability to automatically scan your entire cloud environment and convert all the data into visual graphic maps.

Using Crowdsourcing assistance carried out by the user in your organisation, we create a full, deep data relationship and beautiful understanding maps to give you the ability to explore and fully manage your cloud environments.

On top of the map we include 16 layers of security, governance, monitor, alert, rolls, dependency, budget, that provide you the best real-time easy-to-use powerful management tool.

We align with multi-agency compliance regulations and enables you to see alerts and act fast. With SUNSPOTS you can work productively in the cloud and keep all areas of your business on track:

- ❖ **Visual Graphic Maps** - Auto Scan your multi-cloud and convert it into a visual graphic map.
- ❖ **Crowdsourcing Automatic Scan** your entire multi-cloud for full blueprint.
- ❖ **Mapping & Monitor** Permissions, Dependencies, Rolls and RBAC.
- ❖ **Governance & Security Policies** Create, Monitor & Deploy using simply maps.
- ❖ **Auto shutdown, Budget constraints, New Services & Resources approval** from a single visual mapping platform.
- ❖ **Take Real Action** on everything from simple alerts to user activity suspension.
- ❖ **Monitor real-time Regulation compliance** and suggest ways to be fully compliant.
- ❖ **White-label Platform** for cloud Service Providers (MSP/CSP) to provide their customers with a holistic cloud management experience.
- ❖ **3rd generation Cost & Budget** multi-cloud ability to link individual budget group items to a visual map.
