

# Monitoring

## Value Proposition:

- One source of truth in real-time
- Minimize downtime & COGs
- Maximize throughput & sales

Digital Factory has helped present more accurate downtime metrics than we were previously tracking. This has allowed for driven actions to be put in place and monitored. The company is constantly updating their trackers as well to better improve customer use.

## Top Use Cases

- Line digital performance mgt.
- Real-time OEE & downtime tracking
- Shift tracking/handover, WO performance
- Root cause analysis & trend analysis

- Labor performance management
- Labor location & status visibility
- Labor overtime tracking & management
- Labor utilization analytics

- Asset location & status visibility
- Asset utilization analytics
- Asset investment planning (hoppers, bins)
- Asset-specific smart alerts

## Combination Use Cases

- Skill matrix & labor experience management
- Work order readiness visibility
- Bottleneck identification & resolution
