

Increase the effectiveness of your work – prompt and efficient migration from Lotus Domino

We have reinforced on implementations of Office 365 in organisations which used IBM Lotus Domino previously. This change resulted in increase of effectiveness in those companies.

HOW DO WE DEAL IN POZNAŃ WITH MIGRATION FROM IBM LOTUS DOMINO TO OFFICE 365?

Pre-implementation analysis

The very first and crucial step. It is a deep dive discussion which leads to come to know your needs. For us it means current technical environment in your organization.

The change of system is a difficult change for years. Once you take it you need to be sure it will be done in smooth manner.

End-user trainings

We will conduct whole series of trainings in which different groups of users will be involved. Those trainings are done on fully prepared system so the participants get unassisted skill of fluent work on new solution.

The training sessions help users to use the system according to the assumptions agreed during analysis phase.

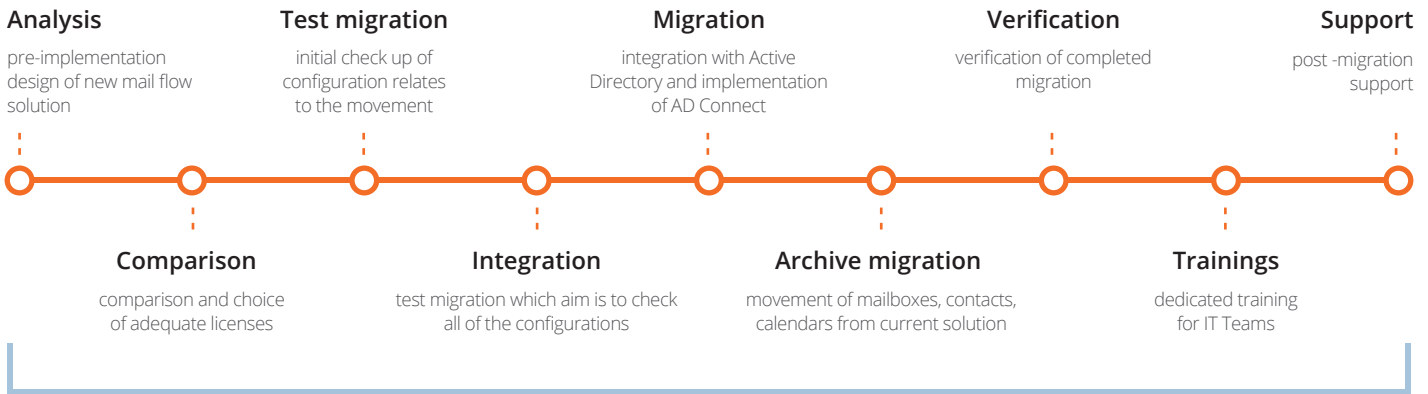

Professional technical support

We are professionals who guarantee the highest quality of our service. On the other hand we are decent people that you can always talk to.

None of the phase of implementation is done without you! We are in this TOGETHER.

TIMELINE

SUPPORT

Migration to O365 with no worries:

- Availability of official Microsoft documentation, resources of TechNet or MSDN
- Availability of free as well as chargeable training offered by Redmond giant or other thirs companies
- Millions of practical information on forums, social blogs available at any time for a person who operates on Exchange Servers or SharePoint.
- Availability of YouTube channels as well as more official sources like Channel9
- Thousands of movies, directories, tutorials and presentation which shows ways of configurations and solutions of technical issues related to Microsoft software

Why it is worth to decide to migrate from IBM Lotus Domino to Office 365?

- Indisputably the best, the most transparent mailbox interface and the software which organize personal space like: calendars, contacts, tasks
- Web client access – Exchange 2016- with possibility to use right mouse click to open the context menu of mailbox software – small thing – big change!
- Mobile device support – based on Android, iOS and Blackberry system – where mail account does not require installation and configuration of any additional application
- Better performance than IBM product – for example the time of launch mail acct or folder research
- Office software which interface is coherent with online tools
- Availability of support
- Flexibility of cloud computing
