

# Unleash the Power of AI with Microsoft Copilot

Unlock the potential of AI for your business with our comprehensive training service, designed to introduce and master Microsoft Copilot within Microsoft 365.

Our service is tailored to both business users and IT departments, aiming to equip your team with the necessary knowledge and skills.

## What makes our workshops a must-attend?

+

### Experienced trainers

Our workshops are led by AI experts who use Copilot on a daily basis. They bring their real-world experience to the table, ensuring you get the most out of each session.

+

### Tailored offerings

We customize the scope of the training to meet the needs of your organization and the nature of the participants' work. This ensures that the training is relevant, practical, and immediately applicable.

+

### Data security

With our Microsoft specialization in security, we also take care of the appropriate configuration to ensure the safety of your company data.

## Check out our exciting workshop offerings!

1

### Introduction & Basics

Kickstart your journey with an understanding of AI principles and how they are revolutionizing industries, streamline your business operations from task automation to advanced analytics.

2
