

With Most organizations that have implemented RPA have seen limited success in realizing “measurable” gains. Getting truly scalable process automation done is easier said than done. The differentiating factor is your choice of RPA solution Not all RPA products are created equal. Does your RPA solution empower you to achieve Hyper Automation as defined by Gartner? Does your RPA let you develop truly cognitive bots that leverages the best of AI & ML technologies? Does your RPA let you develop bots in an agile manner and deploy them at scale? While process automation makes technical sense, does it mean “business sense”?

When good enough process automation is not good enough, consider Robility.

Effective automation

Intelligent automation

Scalable automation

Automate the automation

Business sense automation

Sutherland Robility is Hyper Automation ready and comprehensive RPA platform. Organizations that have earlier used popular RPA products highly recommend Robility upon changing over. Robility is power packed with significant AI and learning capabilities. Developers love to use Robility to create effective process automation at scale. Robility is the only RPA product that offers “license on a tap” – thus reducing your total cost of automation. Finally, here is a RPA platform that makes “better business sense”.

Sutherland Robility is Hyper Automation ready and comprehensive RPA platform that makes “better business sense”.

Sutherland Robility

Our Robility is built based on firsthand understanding of the requirements of true automation and expertise from practitioners. Robility as a platform can support end to end automation or can function as a standalone entity for phase of your existing automation tool.

Automate effectively

Robility is an end-to-end automation platform that addresses the entire process automation lifecycle. Use Robility to capture requirements effectively, manage multiple projects with ease, develop complex automation rapidly, orchestrate and manage business process integration and better manage automation deployment. With all these being in one integrated platform, you don't have to invest in multiple third-party products and eliminate the risk of tool cocktail.

Automate intelligently

Robility is power packed with advanced AI technology. Our native AI capabilities helps you better process unstructured data. With enhanced computer vision and advanced natural language processing capabilities, you can automate processes that were earlier considered non-automatable. Robility can integrate with any third-party AI technology. Finally, our intelligent designer lets you create bots at one third of the time.

Automate at scale

With Robility, you can have a bot for every employee, enabling them to achieve higher productivity. Employees can use assisted desktop bots to achieve simple automation and voluminous transaction processing. Deploy un-assisted bots on cloud with your enterprise applications enable pre-processing, or post processing. Robility supports an array of deployment models, including on-premise, IaaS, PaaS, and Hybrid options.

Automate the automation

Sutherland Robility process mapper diligently and non-obtrusively observes how your employees interact with enterprise applications, the workflow they handle and how exceptions are processes. The process mapper then maps the entire process journey and makes it automation ready. Eliminate costly re-work and long development effort by creating bots first-time right, every-time right.

Business sense automation

Overpriced RPA does not offer the value you deserve. Sutherland Robility “license in a tap” model saves you millions of dollars in license costs by eliminating the need for run-time overstocking. A bot license is used only when it needed and not locked to a system, or a user. What more? Our hyper automation capabilities let developers create bots much quicker thus reducing your DevOps costs. Finally, our responsive user interface even enables business users to create simple automation at ease.

Challenge the status quo. Organizations that shifted to Robility highly adore it and have reported measurable gains. Robility makes technical sense by significantly enhancing automatability of your processes. Robility makes business sense by allowing you to automate without breaking the bank. Consider Robility. The change will be well worth it.

Dur Robility is built based on firsthand understanding of the requirements of true automation and expertise from practitioners. Robility as a platform can support end to end automation or can function as a standalone entity for phase of your existing automation tool.

As a process transformation company, Sutherland rethinks and rebuilds processes for the digital age by combining the speed and insight of design thinking with the scale and accuracy of data analytics. We have been helping customers across industries from financial services to healthcare, achieve greater agility through transformed and automated customer experiences for over 30 years. Headquartered in Rochester, NY., Sutherland employs thousands of professionals around the world.
