

Who are we?

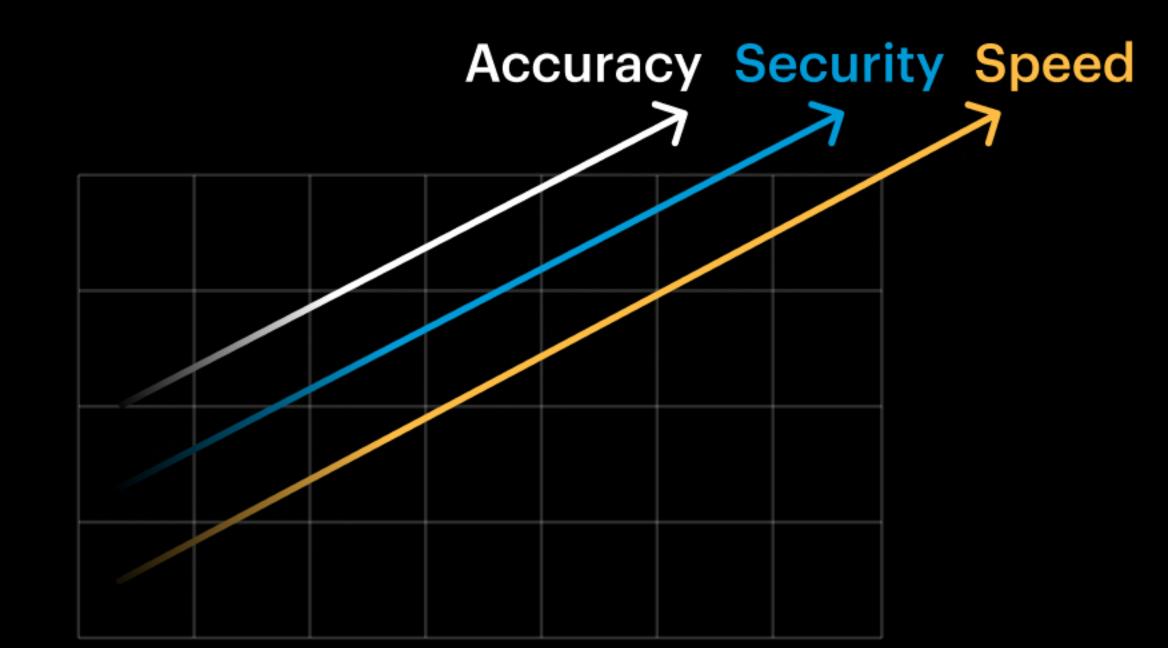

World's First & Only Autonomous Al Training Platform

The SwarmOne platform is an abstraction layer that evaluates your model, determines the optimal training strategy, allocates GPU power, and starts training directly from your IDE.

Our Technology guarantees your Al workload will run!

SwarmOne handles the compute and optimization seamlessly, allowing you to focus purely on model development, with a guarantee of uninterrupted execution

"SwarmOne provides Instant computeheavy training, with unparalleled speed, accuracy, transparency, and affordably."

Irad Ben-Gal, Ph.D. CS Head of LAMBDA AI Lab

We support more than 1M models including all of the models on Hugging Face

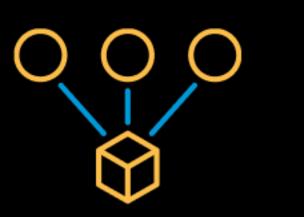

Use any framework

Train any size model

Works with any IDE

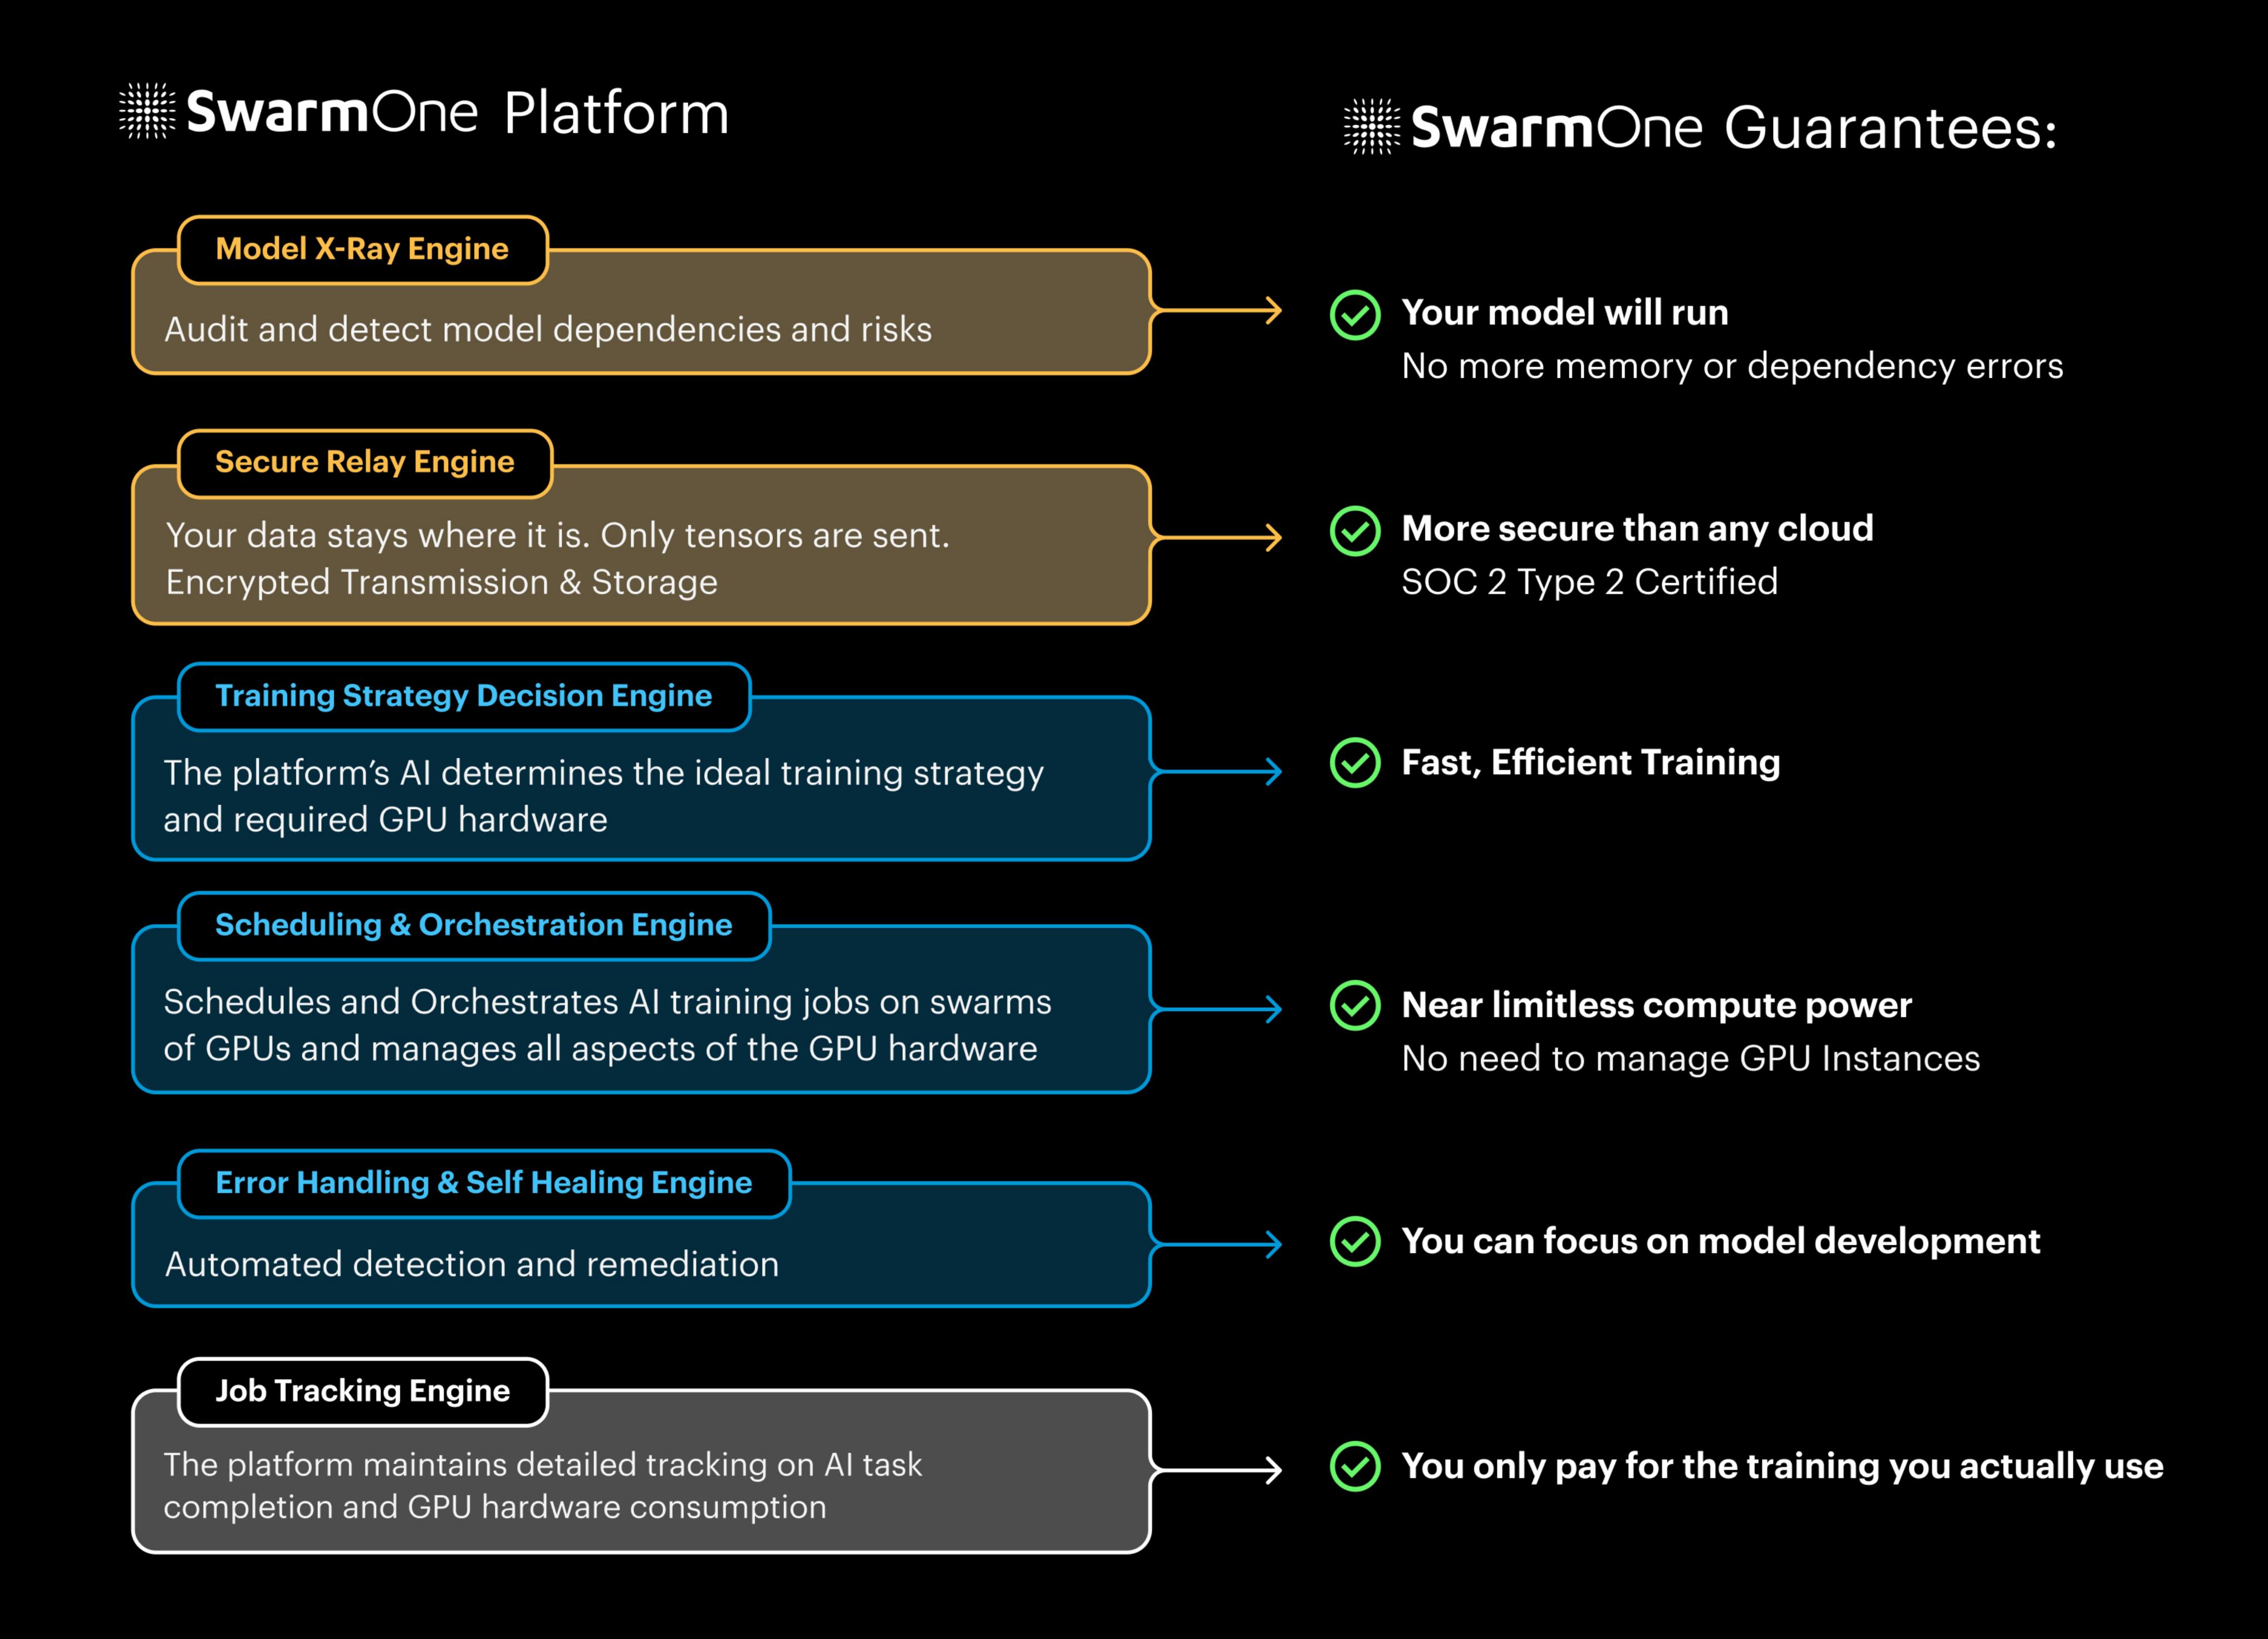

✓ Fast Onboarding

- Increased Productivity
- **✓** Proven Results

- ✓ Faster Time-to-production
- ✓ Time & Cost Savings
- **✓** Full Flexibility

The platform has run 890,000 hours of Al training jobs of all different types including LLM, computer vision, time series, tabular, audio, and video
