

Driven Modern Data Platform for Sustainability

Pressure to meet sustainability goals is rising, but siloed data often complicates reporting, obscures insights, and hinders progress. BDO Digital's 4-Week Sustainability Assessment leverages Microsoft Fabric and Microsoft Sustainability Manager to unify your data, providing a foundation for reliable baseline reporting, enhanced compliance, and actionable insights.

ACHIEVE SUPERIOR SUSTAINABILITY OUTCOMES

BDO Helps Organizations:

- ▶ Align sustainability goals with business objectives.
- ▶ Drive efficiency and reduce compliance risks.
- ▶ Build trust through transparent and accurate reporting.

Our assessment delivers a complete sustainability picture powered by integrated data platforms, helping ensure alignment with industry regulations and standards.

KEY ROADMAP DELIVERABLES

- ▶ **Strategy:** Define a sustainability vision and identify opportunities for immediate impact.
- ▶ **Data Collection:** Centralize environmental and social data using Microsoft Fabric and Sustainability Manager.
- ▶ **Streamlined Reporting:** Improve reporting accuracy and prepare for regulatory requirements with tools like Azure Emissions Impact Dashboard.
- ▶ **Compliance Support:** Address carbon reporting, greenhouse gas assurance, and transparency needs.
- ▶ **Integration:** Embed sustainability into your brand, business, and financial strategies for continuous improvement.

4-WEEK ASSESSMENT EXPECTATIONS

PHASE 1 Consultation	PHASE 2 Maturity Assessment	PHASE 3 Analysis	PHASE 4 Business Case & Roadmap
Collaborate with BDO to define your sustainability vision, business needs, and reporting goals.	Evaluate your existing digital infrastructure and readiness for sustainability initiatives.	Identify gaps and opportunities to improve reporting accuracy, speed, and sustainability outcomes.	Develop a strategic implementation plan outlining cost savings, reporting efficiencies, and business benefits.
