## BDO DIGITAL

# Enforced Information Protection

## Do you have controls and monitoring in place to protect important organizational data?

### HOW IT WORKS

BDO will deploy an information protection solution within Office 365 using integrated tools, configure tools for insight into data leaving your organization and train your team on how to manage your external data sharing model.

### TIMELINE

**STEP 1 - Discovery:** Discovery for broad data categories and locations within their system as well as O365 usage analysis

**STEP 2 - Use Case Development:** Develop system behaviors for email, OneDrive, SharePoint and Teams data sharing activities

**STEP 3 - Tool Configuration & Rollout:** Configure Cloud App Security, Azure Information Protection and O365 mail flow rules to enforce accepted behaviors

**STEP 4 - Training & Production Support:** Train Client's IT department and provide short period of production support

### RESULTS:

▶ Data labeling rolled out

▶ PII visualized and acted upon within business parameters

▶ Full visibility into data sharing from Office 365 core components

▶ Internal IT team able to react to under desirable sharing from O365
