

Benefits

Unlock Innovation with Azure-Powered OpenAI

BDO's Intelligent Virtual Assistant (IVA) is a powerful AI solution built directly within your Azure environment. It delivers enterprise-grade AI, tailored to your unique business requirements, with superior security to protect your confidential data. Our AI Accelerator is a fast-track implementation program to design and deploy your custom AI quickly and effectively.

Advanced features

From document processing to AI-driven assistants, BDO IVA delivers robust functionality. It integrates seamlessly with enterprise data platform tools like Power Platform and UI Path.

Seamless Azure integration

Fully compatible with your existing Azure environment, the IVA simplifies deployment and aligns with your current IT infrastructure.

Industry-specific focus

Designed with sectors such as finance, manufacturing, energy, and healthcare in mind, the IVA delivers relevant, effective solutions to meet complex demands.

Expert guidance

BDO's experienced team supports you throughout the implementation process, helping you understand the full potential of your AI solution, and gain confidence in its many applications.
