InsurHub Analytics for Insurance Accelerator

Insurers all over the world are facing growing pressure to exceed shareholder goals and while winning and maintaining their customer base. Unfortunately, siloed data complicates reporting, obscures insights, and hinders goal tracking. BDO Digital's 4-to-6 Week InsurHub accelerator is a fast-track to reliable reporting, analytics, and tracking on the health of your insurance business.

TYPICAL CLIENT OPPORTUNITIES

Disparate and Siloed Data
Data spanning across multiple application systems means that you can never see the full health of your business in one place
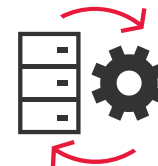

Labor Intensive Reporting
Manual reporting costs time and can lead to errors and missed opportunities

Insights Are Difficult
Human interaction is required to analyze data across multiple data sources

Data Quality
Transforming data from multiple sources could delay decisions and compromise insights

HOW BDO CAN HELP

Connecting Core Enterprise Data - Connect data sources that power your business so everything is in one place

Analytics and Machine Learning - Use advanced analytics to gain valuable insights that drive decisions

Data Governance and Security - Have your data in one place for your users while also ensuring only the right people have access

Adoption of New Standards - Get compliance-ready and implement new standards without disrupting your workflows

InsurHub is a Modern Data Platform for Enhanced Insurance Analytics

BDO's InsurHub Analytics for Insurance accelerator will employ a structured approach to help insurers harness the power of their data and gain valuable insights through industry-specific analytics, dashboards, and reporting.

Estimated project timeline:

We estimate this initial accelerator implementation to take 4-6 weeks.

Typical implementation includes:

▶ Technical Analysis and Advisory

▶ InsurHub Analytics Deployment

▶ Predictive Models and Dashboards

▶ Full Adoption Roadmap

PHASE 1
Assess and Plan

BDO will work with your organization to deep dive on specific goals, business drivers, and workloads in place today

PHASE 2
Design and Architect

Together, we will review your technology estate and architect a unified data and InsurHub implementation strategy

PHASE 3
Implementation

BDO will work with your technical experts to deploy InsurHub, connect baseline data sources, and build customized dashboards

PHASE 4
Innovate

After initial deployment, BDO will work with you to craft a roadmap that includes more data sources and AI features

InsurHub Accelerates Maturity Across The Data Spectrum
