BDO DIGITAL

Power Platform Rapid App Prototype

"I want to quickly leverage the capabilities of low code to quickly develop a solution that addresses my business needs."

Delivering rapid apps on a low code platform, BDO Digital can help make sure you reap the benefits.

BDO Digital will help you advise, deploy, and manage solutions configured to meet your specific needs.

HOW WE CAN HELP

▶ **Digitize Manual Processes:** Help improve efficiency by automating task & processes with applications tailored to your business.

▶ **Accelerate Onboarding:** Onboard employees with minimal training and enable them to help increase productivity.

▶ **Protect Your Solutions:** Take advantage of built-in security, audit, and compliance features that safeguard your business.

BENEFITS OF LOW CODE SOLUTIONS

▶ **Faster development**

▶ **Increased productivity**

▶ **Accessibility for non-developers**

▶ **Rapid prototyping and iteration**

▶ **Integration capabilities**

▶ **Reduced maintenance and support**

▶ **Cost-effectiveness**

Overall, low code solutions like Microsoft's Power Platform offer a more efficient and accessible way to develop applications, helping to enable faster development cycles, increase productivity, and cost savings.

Delivery Approach -

Step 1: Design

▶ Whiteboard session to identify top 3 priorities. 1 – 2 working sessions to design prototype use case including business justification.

Step 2: Deploy

▶ Setup host environment.Develop and deploy functioning prototype.

Step 3: Refine

▶ Refine and iterate based on user feedback. Develop a roadmap for future adoption.
