

Microsoft Security Copilot **Proof-of-Value and Adoption Plan**

Move forward confidently along the path
to adopting the power of Generative AI for
Security.

Prove the Value of Microsoft Security Copilot

Establish the necessary safeguards against excessive access and misuse while readying your group for safe, cost-effective adoption.

BDO's Security AI Specialist team is among the best in the world. We use Microsoft's latest, AI-powered platforms to accelerate assessments and reduce the time to engineer solutions.

BDO brings **operational effectiveness** to better understand your IT environment, provides tailored **architecture** and detailed posture **insights** for identity and devices.

Future-proof your workplace security to empower your business with BDO.

50,000+ GLOBAL CUSTOMERS

250+ SECURITY SPECIALISTS

A Low-Risk, High-Impact Approach to AI-Powered Security

Security leaders are looking to Generative AI for Security to improve their performance across operations and engineering. But how do you adopt Microsoft Security Copilot while safeguarding sensitive data? And how do you justify the investment?

TYPICAL CLIENT CONCERNS

Limited Resources

Over allocated personnel and financial resources hinder effective operations.

Emerging Threats and Tech

Modern security teams must invest heavily in upgrades and skills to keep pace with AI-driven threat actors.

Complexity

Complexity requires advanced tools and knowledge to manage effectively.

Secure Productivity

Teams need a broad range of adept guidance and advanced technologies that aren't available internally

Guidance & Deployment

Integrate your broader security ecosystem safely for threat visibility, and setup an evaluation model.

Prove Value - Set up automation workflows to reduce incident response times, improve alert management and investigations while capturing pain points and metrics

Getting Ready - Get a winning plan for how best launch a controlled adoption while realizing the highest gains at the lowest cost

Proof-of-Value and Adoption Plan Engagement

TYPICAL ONBOARDING

Onboarding clients typically takes just 2-6 weeks.

KEY BENEFITS OF BDO'S SERVICE

► Business and Technical Outcome:

- BDO packages our findings for use by both risk management and CFO decision makers

► Acceleration:

- BDO offers tactical steps to help you progress rapidly with confidence, drawing on our internal experience, close collaboration with Microsoft's product group, and extensive experience with clients who have adopted AI solutions

PHASE 1 Prepare

Identify goals, challenges and project risks. Identify and address dependencies on people & tech.

PHASE 2 Design

Define the technical boundaries, use cases and measurements that will fully and quickly prove value.

PHASE 3 Deploy

Integrate systems with Security Copilot and empower a cohort of users with Promptbooks and threat intelligence.

PHASE 4 Evaluate

Capture results, assess and frame the cost-effective adoption pathways.

How BDO Helped a Large Healthcare Nonprofit Standards Firm Assess Security Copilot

Industry:

- ▶ Healthcare

Brief Company Description:

- ▶ Authoritative scientific nonprofit organization that sets standards for the identity, strength, quality, and purity of medicines, food ingredients, and dietary supplements

Area of Focus:

- ▶ Management controls for pay-as-you-go spending of Security Copilot and excessive security administrator access of line-of-business data

BUSINESS CHALLENGE

- ▶ While exploring productivity gains from Copilot, BDO discovered that that significant sensitive data was overshared and surfaced to unauthorized users
- ▶ Security Copilot inherited the excess access issue and proved costly when run using ad hoc prompts

SOLUTION

- ▶ With industry-proven use cases customized for the client, BDO was able to prove the value of Security Copilot for key operational metrics for threat hunting, investigations, and training
- ▶ BDO provided an access model, dashboard and prompt library to limit costs
- ▶ BDO used existing tools to limit security admin access to line-of-business data

RESULTS

- ▶ For the proof-of-value use case, Copilot seamlessly adopted the new protections and no longer surfaced sensitive information to security administrators
- ▶ Client has an adoption plan for adding use cases over time as access controls are deployed
- ▶ Related investigation-metrics have improved by over 20% using BDO's targeted prompting approach with cost control

‘BDO’, ‘we’, ‘us’, and ‘our’ refer to one or more of BDO International Limited, its network of independent member firms (‘the BDO network’), and their related entities.

The BDO network is an international network of independent public accounting, tax and advisory firms which are members of BDO International Limited and perform professional services under the name and style of BDO (hereafter: ‘BDO Member Firms’). BDO International Limited is a UK company limited by guarantee. It is the governing entity of the BDO network.

Service provision within the BDO network is coordinated by Brussels Worldwide Services BV, a limited liability company incorporated in Belgium. Each of BDO International Limited, Brussels Worldwide Services BV and the BDO Member Firms is a separate legal entity and has no liability for another entity’s acts or omissions. Nothing in the arrangements or rules of the BDO network shall constitute or imply an agency relationship or a partnership between BDO International Limited, Brussels Worldwide Services BV and/or the BDO Member Firms. Neither BDO International Limited nor any other central entities of the BDO network provide services to clients.

BDO is the brand name for the BDO network and for each of the BDO Member Firms.
