

# Microsoft Security Copilot: POV & Adoption Plan

Security leaders are looking to Generative AI for Security to improve their performance across operations and engineering.

But how do you adopt Microsoft Security Copilot while safeguarding sensitive data? And how do you justify the investment? Using proven methods and empirical data, we will help you feasibly adopt the power of AI for your defenders, providing a business-focused report with Proof-of-Value (POV), training and budgeting guidance.

## WITH BDO'S SECURITY COPILOT POV & ADOPTION PLAN, YOU GET:

### Empirical Business Case and high-level plan for adopting Security Copilot, including:

A functioning Security Copilot service in your environment

Designs for integrating Security Copilot with the broader security ecosystem for threat visibility and operational agility

Catalog of automation workflows to accelerate incident response times and resilience against cyber threats

Data protection controls for integrated systems

POV findings with callouts on how to best streamline operations while improving benchmarks for alert management, incident investigation and response processes

## CLIENTS VALUE THESE KEY ASPECTS OF BDO'S POV ENGAGEMENT:

- **Business and Technical Outcome:** BDO packages our findings for use by both risk management and CFO decision makers
- **Acceleration:** BDO offers tactical steps to help you progress rapidly with confidence, drawing on our internal experience, close collaboration with Microsoft's product group, and extensive experience with clients who have adopted AI solutions

Prove the value of Microsoft Security Copilot & establish the necessary safeguards against excessive access and misuse while readying your group for safe, cost-effective adoption.
