BDO DIGITAL

Threat Protection Assessment & Zero Trust Architecture

Are you unsure of your security posture?

HOW IT WORKS

BDO Digital's team will use Zero Trust principles to identify improvements for your security architecture, while assessing your workplace security controls with Microsoft Defender XDR and Microsoft Entra for valuable insights into your network, identity, device, and Microsoft Office 365 protections.

Upon request, BDO can use Microsoft's Zero Trust Assessment Tool and further assess data, advanced identity and advanced device controls. By the end of this engagement, you will be presented with an architecture, findings, proposed initiatives roadmap, and actionable next steps.

TIMELINE

Workshop: Customize Microsoft's Zero Trust model and pathways for your organization

Assess: Identify your current issues using Microsoft Entra and Defender XDR tooling

Report: Review curated insights from the assessment & architecture to set priorities and build an action plan

Next Steps: Craft an executive read-out and position findings & Zero Trust Architecture for action

RESULTS

▶ **Zero Trust Architecture**
Blueprint to stop intruders in your organization using the latest, proven security architecture

▶ **Threat Protection Assessment**
- Understand your vulnerabilities
- Learn how to quickly fill gaps
- Learn how to continuously monitor gaps with Microsoft Defender XDR and Entra
