

# SwiftGo

## SOLUTION FOR RETAIL & CONVENIENCE STORES

Reduce touch points and increase shopper safety in stores by eliminating check-out lines at supermarkets while addressing shrinkage/theft concerns

Customer logs-in to retailer app (powered by SwiftGo) at store

Customer gets item, scans it with app, and puts scanned item in cart/basket

App shows credit cards that are on file (including e-wallet) Customer chooses method of payment

Customer gets a cart & scans it with app – The cart's light turn blue. Customer may start shopping

Once the customer is ready to check-out, they press check-out

Once payment is processed, LEDs will turn green. Customer can leave the store

# SwiftGo Differentiators

## Turn-Key platform:

Be up and running in as little as 2-4 weeks

## Shrinkage Control:

Patented and independent verification modules in place to prevent shrinkage/theft

## Build on existing assets:

No need for store overhauls or multiple implementations

## White-labeled platform:

Keep your customers and build on your branding

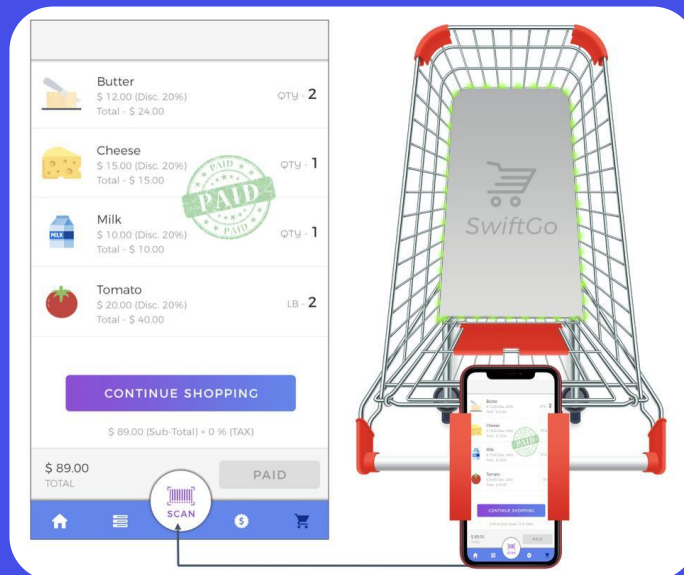

## Feature-rich API:

Easily integrate inventory, POS, discount/promotions and provide features like shopping list, location pointer, pick-up and go

# SwiftGo Technology

A feature rich white-labeled SaaS platform that allows retailers to provide a swift, easy, omni-channel shopping experience

Patented and Independent Shrinkage Control Module that retrofits onto retailer's existing assets allowing them to eliminate check-out lines

Turn-key platform using existing data points to allow for shorter implementation time

SwiftGo platform allows retailer to apply machine learning technology/tools to make personalized, supplemental item suggestions in real-time

## Core Value Proposition

Eliminating check-out lines at supermarkets while addressing shrinkage/theft concerns  
**Safety. Efficiency. Transparency. Security. Data.**

Eliminates check-out lines

Improves customer safety by reducing touch points

Addresses Shrinkage concerns

Enables real-time personalized engagement

Enhances in-store customer shopping experience
