

IoT Connector Starter Package

Swisscom IoT Cloud Connector Services help you to build IoT applications that are low cost, use low data rates and can have a long battery life up to many years. It's secure and highly scalable because of its integration into the Swisscom Mobile Network (NB-IOT, LTE-CATM1, LTE, 5G) with world wide coverage.

Do you want to realize a massive IoT Use Case?

This package guarantees you a quick and easy start on your low power journey from the device to cloud.

- ✓ 10 SIMs, 3 months of Swisscom CMP incl. Cloud Connector
- ✓ Low Power to the Cloud Starter Workshop (3 hours)
- ✓ Support & Consulting (8 hours included) based on needs

Price on-off (OTC):

CHF 1500.-

Low Power IoT Expertise: Consulting Areas

Device

- Best Practice in Power Consumption
- Best Practice in Data Efficiency
- Connectivity Settings & Technology (NB-IOT, LTE-CATM1, (LoRaWAN)
- Protocols (UDP, COAP, MQTT, LWM2M, LoRaWAN)
- Device Security

Connectivity

- Training Connectivity Management Plattform
- Training Cloud Connect Settings

Cloud

- Cloud Gateway Configuration
- Device Communication via Cloud Connector
- E2E Security by Design
- Solution Design
- Cost Optimization
- Application integration
