

Do you already use Microsoft Teams for digital communication and collaboration? Would you like to drive forward your company's digitalisation and integrate business applications directly into Microsoft Teams? Start your journey with our Business Apps Discovery package.

Use Microsoft Teams as a Business Apps platform – for even more efficiency and agility. Together we analyse a selected business case from your company. At the end of the workshop, you will have a prototype of your use case integrated into Microsoft Teams.

What does our Business Apps Discovery package include?

In a 5-day workshop, our experts share their years of experience in analysing and deploying business apps. What are the options for integrating business cases into Microsoft Teams? Which business cases can be integrated and when does an integration bring real added value for you and your company? We answer your questions, define a selected business case together and accompany you until the provision and presentation of a prototype in Microsoft Teams. We will then review further development steps together.

Your benefits with the Business Apps Discovery package from Swisscom

- **Inspiration**
With concrete, practical examples, we show you how you can drive your company's digitalisation with Microsoft Teams.
- **Foundation**
Together with you, we define the foundation for mapping further business cases in Microsoft Teams.
- **Support**
Benefit from our experience and knowledge from other projects and our additional services around the topic of Microsoft 365.
- **Outlook**
Take advantage of our additional offer for application modernisation or individual software development.

Your advantages with Microsoft Teams as a Business Apps platform

Better Apps & Agility
Direct translation of domain knowledge leads to better apps – from the business for the business.

Distributed Budgets
Business units can use their own budgets, leading to more control and transparency.

Full Digitalisation
Driving the digitalisation of every aspect of the company and not just core processes.

Reducing IT bottleneck
Not every single digitalisation effort must pass IT, and therefore reduces the bottleneck.

Adoption Speed
Quicker adoption to changing business climate demands.

Democratising Data
Giving users access to available data will lead to creative insights and solutions.

Facts & Figures

Duration and costs

Duration: 5 days, composed of

- Inspiration and discovery workshop to discover the possibilities of how your business cases can be integrated into Microsoft Teams.
- Interview and analysis workshop with your stakeholders to capture the detailed requirements and scope for your prototype.
- Deployment of the prototype according to the defined scope.
- Presentation of the prototype and further development steps.

Costs: 9'800 CHF, includes necessary Power Platform licensing via Swisscom CSP during 3 calendar months (Per User/App Plans).

Procedure

Inspiration

In a first workshop, we will show you how you can map business cases in Microsoft Teams. Together we look behind the scenes of successfully implemented projects, that show how quickly, easily and efficiently business apps can be deployed in Microsoft Teams.

Analysis

In a half-day workshop, we conduct interviews with your stakeholders and define the scope of the prototype.

Provision

We build your individual prototype for you and make it available to a defined target group via Microsoft Teams.

Presentation

In conclusion, the development steps, as well as the prototype, are presented and the further procedure is determined.

Optional services

We support you with additional services on your way to the Microsoft Cloud.

We conduct workshops tailored to your needs to analyse or implement business applications and concrete use cases.

We support you in the secure use of the Microsoft Power Platform and define the operational operational aspects such as support, environment concept, DLP policy configuration, licence management and on-premise gateways.

We support you in modernising your application landscape and concentrating on your core business through our managed services.

We take a holistic approach to our portfolio. In addition to Professional Services, Managed Services and our Reselling+ portfolio, we are also your partner for Microsoft 365 and Dynamics. Learn more at www.swisscom.ch/microsoft365
